

DATE: October 14, 2015
TO: Board of Commissioners
FROM: Patrick Quinton, Executive Director
SUBJECT: Report Number 15-60
Update on the Tax Increment Financing Set Aside for Affordable Housing Policy

BOARD ACTION REQUESTED

No action is requested; information only.

SUMMARY

The purpose of this item is for Portland Development Commission (PDC) staff to provide another update to the PDC Board of Commissioners (Board) on the Tax Increment Financing Set Aside for Affordable Housing Policy (Set Aside Policy). The Set Aside Policy, which was originally adopted in 2006, stipulates that PDC annually provide a set amount of Tax Increment Funds (TIF) to the Portland Housing Bureau (PHB) for the construction and preservation of affordable housing in urban renewal areas (URAs).

PDC staff last briefed the PDC Board on the Set Aside Policy on September 9, 2015. Since then, the Portland City Council (City Council) held a work session on the Set Aside Policy on October 13, 2015; PDC staff will provide an update on the City Council's work session and feedback at the October 14, 2015, PDC Board meeting. In addition, on October 14, 2015, PHB staff will brief the PDC Board on the recently-published *State of Housing in Portland* (see Attachment A), a comprehensive look at housing in Portland and how the City of Portland (City) is addressing issues related to homelessness and housing affordability.

City Council is expected to take action on proposed changes to the Set Aside Policy at their October 21, 2015, meeting.

BACKGROUND AND CONTEXT

On October 25, 2006, City Council adopted the original Set Aside Policy, requiring that "30% of Tax Increment Financing (TIF) over the life of an Urban Renewal District shall be dedicated to the development, preservation and rehabilitation of housing affordable to households with incomes below 80% median family income." The Set Aside Policy also required that by December 2010, City Council and PDC would conduct a thorough review of the Set Aside Policy's impact on TIF revenues, city housing, and other goals, and consider changes, if necessary.

On November 4, 2011, City Council adopted amendments to the Set Aside Policy. Whereas under the original Set Aside Policy each URA was required to meet its 30 percent requirement (some URAs had slightly different targets) and was based on resources, the amended Set Aside Policy established a 30 percent citywide benchmark minimum focused on expenditures and created sub-URA-by-URA goals as

targets. The ordinance authorizing the amended Set Aside Policy additionally required that by June 30, 2015, City Council and PHB would conduct another thorough review and consider changes, if necessary.

In summer 2015, PHB requested that City Council postpone its hearing on the Set Aside Policy to September 30, 2015. Since then, PHB has engaged the Portland Housing Advisory Commission (PHAC), a volunteer public advisory body that advises the PHB director, the Housing Commissioner, and City Council on a range of housing policy and program issues, and PHAC has recommended that City Council increase the Set Aside Policy from 30 to 50 percent. Following is a high-level schedule of past and future meetings related to the Set Aside Policy:

- July 9, August 4, September 1: PHAC Review & Recommendation
- September 2: PDC Budget Advisory Committees Discussion
- September 9: PDC Board Discussion
- October 13: City Council Work Session
- October 14: Final PDC Board Discussion
- October 21: Report to City Council

At the September 9, 2015, meeting, PDC staff presented several scenarios to the PDC Board that elaborated how potential changes to the Set Aside Policy could affect current PDC priorities. At the meeting, the PDC Board stated that it needed additional time to continue the conversation and additional information in order to make a recommendation. Some specific considerations and questions included:

- Interest in holding in-depth, URA-by-URA conversations about opportunities and community priorities.
- What is the estimated shortage of units by income category across the city?
- Desire to develop a comprehensive, long-term solution for affordable housing funding in Portland. How does this conversation sync with the *State of Housing Report* and funding strategies?
- What would be the impact to currently planned projects and initiatives, staffing, and financial sustainability of the agency?

PDC staff will address these topics at the PDC Board meeting of October 14, 2015.

The current state of the Set Aside Policy budget and forecast for affordable housing across URAs and in aggregate can be found in Attachment B.

Foreword from Housing Commissioner Dan Saltzman

Dear Portlanders –

This second phase, and final version, of the *2015 State of Housing in Portland Report* is a comprehensive look at housing in Portland and the efforts by your City government to address issues related to homelessness and housing affordability.

The phase one version of this report brought together data from public and private sources on Portland households, income, demographics, and residential development, to give us a picture of where we have been as a city, and where we are going. This final report builds on that work by taking an internal look toward City government to assess our success at implementing policy and program goals that have been set over the years.

We have been successful at meeting many of the goals we have set as a community and we must celebrate these accomplishments. At the same time, we have fallen short on many others and we must be honest about these shortcomings to inform better policy, programming, and funding decisions in the future.

Over the next few months, you will hear about efforts by my office to stabilize renter households, increase the supply of regulated affordable housing, secure sustainable revenue sources to support affordable housing development, and engage the private development community in being a part of our affordable housing solution.

With the continued partnership of the community, I am committed to working toward a Portland where all of our residents—regardless of their income level, race, or physical ability—can have the opportunity to live and succeed.

Thank you to staff at the Portland Housing Bureau and in my office for their careful guidance and input on this critical report.

Sincerely,

A handwritten signature in black ink that reads "Dan Saltzman". The signature is written in a cursive, slightly stylized font.

Dan Saltzman
PORTLAND CITY COMMISSIONER

Definition of Terms

ACS. American Community Survey

Affordable Housing. The term “affordable housing”, “affordable rental housing” or “housing affordable to rental households” means that the rent is structured so that the targeted tenant population pays no more than 30 percent of their gross household income for rent and utilities. The targeted tenant populations referred to in this section include households up to 80 percent of area median family income.

American Community Survey. An ongoing Census Bureau survey that collects data on age, race, income, transportation, housing, and other characteristics.

Average Asian Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as Asian.

Average Black Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as African American.

Average Foreign-Born Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as being Foreign-Born.

Average Latino Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as Hispanic-Latino.

Average Couple with Family. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as being married with children under the age of 18.

Average Native American Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as Native American or Alaska Native.

Average Portland Household. A household profile developed using data from the ACS to derive the median household income for a household in Portland.

Average Senior Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as over 65 years of age.

Average Single Mother Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as a female single head of household with children under the age of 18.

Average White Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as White Non-Hispanic.

BPS. The City of Portland’s Bureau of Planning & Sustainability

CDBG. Community Development Block Grant

Census Tract. Census Tracts are small, relatively permanent statistical subdivisions of a county or equivalent entity that are updated by local participants prior to each decennial census as part of the Census Bureau’s Participant Statistical Areas Program.

City Subsidy. Locally controlled public funds administered by the Portland Development Commission, the Portland Housing Bureau, or other City bureau or agency, allocated for the purpose of creating or preserving affordable rental housing to households below 80 percent of median family income. City subsidies may be provided to developers through direct financial assistance such as low interest or deferred loans, grants, equity gap investments, credit enhancements or loan guarantees, or other mechanisms.

City Subsidy Project. Privately owned properties of five or more units which receive a City subsidy after the effective date of Title 30.01 through programs designed to create or preserve rental housing affordable at or below 80 percent of area median family income.

Community Development Block Grant. Created under the Housing and Community Development Act of 1974, this program provides grant funds to local and state governments to develop viable urban communities by providing decent housing with a suitable living environment and expanding economic opportunities to assist low- and moderate-income residents. CDBG replaced several categorical grant programs, such as the Model Cities program, the Urban Renewal program, and the Housing Rehabilitation Loan and Grant program.

CoStar. A private real estate research, survey, and data analysis firm.

Decennial Census. The Decennial Census, undertaken by the U.S. Census Bureau, occurs every 10 years, in years ending in zero, to count the population and housing units for the entire United States. Its primary purpose is to provide the population counts that determine how seats in the U.S. House of Representatives are apportioned.

Emergency Shelter. Short-term, temporary assistance that provides overnight stays for adults, youth or families experiencing homelessness—emergency shelters are usually facility-based.

Extremely Low Income. Extremely low-income individuals, households or tenants are those with a gross household income at or below 30 percent of the area median family income.

HOME. The Home Investment Partnerships Program provides formula grants to states and localities that communities use—often in partnership with local nonprofit groups—to fund a wide range of activities that build, buy, and/or rehabilitate affordable housing for rent or homeownership, or to provide direct rental assistance to low-income people.

Homeless. People who are living in a place not meant for human habitation, in emergency shelter, in transitional housing, or are exiting an institution where they temporarily resided; people who are losing their primary nighttime residence within 14 days and lack resources or support to remain in housing; families with children or unaccompanied youth who are unstably housed and likely to continue in that state; people who are fleeing or attempting to flee domestic violence, have no other residence, and lack the resources or support networks to obtain other permanent housing; and households who are unsafely and precariously housed.

Housing Stock. The total number of single-family and multi-family housing units.

HUD. The United States Department of Housing & Urban Development

Land Bank. Governmental or nongovernmental nonprofit entity established, at least in part, to assemble, temporarily manage, and dispose of vacant land for the purpose of stabilizing neighborhoods and encouraging re-use or redevelopment of urban property.

LIHTC. Low-Income Housing Tax Credit

Low Income. Low-income individuals, households or tenants are those with a gross household income at or below 50 percent of the area median family income.

Low-Income Housing Tax Credit. A tax incentive intended to increase the availability of low-income housing. The program provides an income tax credit to owners of newly constructed or substantially rehabilitated low-income rental housing projects.

Median Family Income. Median family income for the Portland Metropolitan Statistical Area as defined by HUD as adjusted for inflation and published periodically.

MFI/MHI. Median Family Income / Median Household Income

Median Household Income / Median Family Income. The median divides the income distribution into two equal parts: one-half of the cases falling below the median income and one-half above the median.

Moderate Income. Moderate-income individuals, households or tenants are those with a gross household income at or below 80 percent of the area median family income.

Multifamily Unit. Includes rental and ownership units in multi-family buildings.

PDC. The City of Portland's Portland Development Commission

Permanent Supportive Housing. Safe, affordable, community-based housing that provides tenants with the rights of tenancy and links to voluntary and on-going support services, including case management, mental health and substance abuse treatment, disability acquisition, healthcare, employment and job training.

PHB. The City of Portland's Portland Housing Bureau

Preservation. The recapitalization of affordable rental housing to improve, stabilize, and safeguard affordable housing units.

Regulated Affordable Unit. A housing unit with a regulatory agreement tied to the deed that requires affordability for an established income level for a defined period of time.

Rehabilitation. The rehabilitation of an existing building into affordable rental housing.

RMLS. A privately owned real estate database.

Single-Family Unit. Rental and ownership units, including single-family homes, duplexes, townhomes, row homes, and mobile homes.

TIF. Tax Increment Financing

Tax Increment Financing. Revenue generated by issuing various debt instruments which borrow against future growth in property taxes within a designated urban renewal boundary.

Transitional Housing. A housing program that provides a place to stay and supportive services for up to two years to assist individuals and families to move into permanent affordable housing.

Unit Produced. A housing unit completed and active in the housing stock.

Unit Permitted. A housing unit with a permit for construction issued.

URA. Urban Renewal Area

Urban Renewal Area. An area included in an urban renewal plan under ORS 457.160.

Report Context

Under the direction of Housing Commissioner Dan Saltzman, the Portland Housing Bureau presented the first annual *State of Housing in Portland 2015 Report* this past spring, drawing on current market data to provide stakeholders and policymakers a comprehensive, real-time look at the state of Portland's housing market by geography, housing type, and the relative affordability to Portlanders based on their income, household composition, race, and ethnicity.

This inaugural report was intentionally published in two phases. The first phase presented a detailed framework of the indicators and analysis that are foundational for understanding the current housing market and the issues associated with housing affordability. It was released in April 2015 and distributed to City Council and other stakeholders to solicit feedback for refinements and additions that would shape the second and final phase of the 2015 report.

Much of the feedback from policy leaders and community stakeholders called for additional detail on the work of the City to address homelessness and affordable housing, as well as to put Portland's housing and demographic data in the context of a broader regional narrative. In the five months since the first phase was published, the City has worked to integrate internal data sets, update its regulatory portfolio, and identify policy goals set in previous planning efforts for inclusion in this final version of the 2015 report. The timing of this report, however, did not align with Metro's update to its regional count of regulated affordable units, and a regional comparison won't be possible until 2016.

While phase one was divided into five parts, the final 2015 report has seven parts, beginning with an overview of the citywide population trends and housing market conditions in the first three parts and moving into a new and more in-depth

presentation of the City's own policies, programs, and funding specific to affordable housing in parts four through seven.

The data in the *State of Housing in Portland 2015 Report* is derived from many sources, including the Census Bureau, Multnomah County, Metro, the City of Portland, and several sources of market data. It is important to recognize that these sources are imperfect and routinely undercount vulnerable populations and Communities of Color. Despite these limitations, an annual publication relies on regularly updated data. Much of the source data used in this report is not produced internally and, as such, the *State of Housing* relies heavily on external data. To whatever extent possible, the Housing Bureau will work to continuously refine the data sets utilized as it moves forward with this reporting.

This report examines housing data at the citywide level and in 24 neighborhood areas. The decision about how to define the neighborhood geographies was driven by two factors: first, the ability to maximize the quality of the data while minimizing margins of error and, second, alignment with the Portland Bureau of Planning and Sustainability. To that end, the 24 neighborhood areas in this report align closely with those in the Portland Plan, with some adjustments along census tract boundaries. For more information on data sources and methodology, please refer to Part 7 of this report.

Neighborhood Analysis Areas

Executive Summary

Since the last *State of Housing in Portland* report was published five months ago, the public dialogue around housing in Portland has reached critical mass and placed a renewed focus on the public resources available for affordable housing development.

The timing of these discussions has coincided with the scheduled review of the Tax Increment Financing Set-Aside for Affordable Housing Policy, currently underway, which provides the primary funding source for affordable housing development, but limits the geographic reach of resources to less than 15% of the city. In this broader context, the updates to this report build on the market analysis offered in phase one with a robust analysis of City of Portland affordable housing policy, programming, and funding.

Over the last several decades, the City has set forth many ambitious policy goals to address homelessness and housing affordability across the city, and with particular focus on the Central City and within each of the urban renewal areas. Part four of this report assesses the City's progress toward those goals in a compendium of the affordable housing targets established in various City policies and planning documents dating back to 1980—including the original Comprehensive Plan, the various Central City quadrant plans, the Affordable Housing Set-Aside Policy, and others. These targets fall into three main areas: funding and resource development, program implementation, and unit production. In some cases, the City is meeting and exceeded these goals, and in others there is still more work to do.

In the urban renewal areas, the City is meeting or exceeding set-aside levels across the board, but overall success varies by district and, frequently, by the resources available there. In particular, rising housing costs observed in East Portland and the associated displacement risk call attention to the homeownership and home repair goals not being met in Lents Town Center. In the Interstate Corridor URA, which has become the focal point of the city's displacement issues, the City and other entities have exceeded goals to maintain the existing affordable rental housing stock, but the City is not currently on track to meet the 2020 production levels established in policy.

The analysis also shows successes in the Central City, particularly on the west side, where regulated rental unit production

remains high in an area of the city with a high concentration of extremely low-income households (below 30% of the median family income), and programs serve a diversity of Portlanders. While the City is not currently meeting the goal of maintaining 8,286 affordable rental units defined by the Central City No Net Loss policy, the loss of affordability since it was established in 2002 has occurred in private market developments, while the number of regulated units in the area continues to grow (currently 6,551 rent-regulated units, and more than 6,800 total affordable units).

Many of the important data findings on the housing landscape and demographics of the city remain unchanged since they were first published this spring. Despite increased permitting and production in the housing market, rents have continued to rise. Average rents across the city have increased between 8-9%, or roughly \$100 per month, since this time last year.

Housing cost and income disparities have limited housing opportunity for the average Black, Native American, and Alaska Native households in every neighborhood in Portland. Updated data since the last report shows that in addition to these populations, housing affordability is increasingly impacting Latino households and single mothers as well.

In the absence of new data from the ACS 2014 1-Year Estimates of population, households, and income data, which was released after this report, initial analysis indicates that inflation-adjusted incomes have remained relatively flat, and that increases in household income to counterbalance increased housing costs have not materialized.

As the 2035 Comprehensive Plan continues to be developed, and Portland establishes its policy framework for the next 20 years, the development of a long-term affordable housing strategy and financing plan will be needed to ensure that progress continues to be made in making Portland a place where all households can afford to live and that housing choice and opportunity is preserved for all.

Section 1

Population, Households & Income

Portland has grown significantly since 2000, adding more than 80,000 individuals and 29,000 households. Population growth has been most heavily concentrated in East Portland neighborhoods, including Gateway, Pleasant Valley, Lents-Foster, and 122nd-Division.

The Central City continued to absorb a significant proportion of overall growth, with the second highest increase in the city. When compared to one another, the growth observed in the two areas differs significantly by household size. The number of larger households in East Portland, as compared to those in the Central City, suggests that families may be less likely or less able to live in the Central City.

African Americans have experienced a slower growth rate than the population as a whole, or that of other Communities of Color, whereas the Hispanic-Latino community has seen the most rapid growth—a 69% increase since 2000.

Median household income has seen only meager growth since 2000. While median income levels have increased among homeowners, renter households have seen their economic position weaken. The rebounding of post-recessionary wages observed among White households has not been shared by other populations, and the inflation-adjusted incomes of Communities of Color continue to fall.

While Portland's homeownership rate is relatively high compared to other cities of similar size and character, the proportion of the population that occupies an owned home has declined since 2000. Communities of Color experience a disproportionately low homeownership rate when compared to White households and the population as a whole.

Although African American and Native American households showed increases in homeownership rates, analysis of corresponding income, affordability, and population trends point to this being a proportional shift as renter households in these communities are priced out of the city altogether, rather than signaling true increases in African and Native American homeownership.

Communities of Color are increasingly moving to Outer East and Southeast Portland. North and Northeast Portland in particular have experienced a significant decline in the proportion of Communities of Color since the year 2000.

Population

Portland’s population increased by more than 80,000 individuals between the year 2000 and 2013, growing from 529,121 to 611,134 individuals. African Americans experienced the lowest growth at 6.8% with the Hispanic-Latino population experiencing the highest growth at 69.1%. With the exception of the African American population, Communities of Color experienced significantly higher growth rates, nearly three times higher, than White individuals or the Portland population as a whole.

Population growth has been most heavily concentrated in neighborhoods in East Portland, including Gateway, Pleasant Valley, Lents-Foster, and 122nd-Division. The Central City continued to absorb a significant proportion of overall growth with the second highest increase in the city. Minimal growth has occurred in Tryon Creek-Riverdale, West Portland, and Hayden Island-Bridgeton.

Change in Population by Neighborhood 2000-2013

Fig. 2.1 Population by Race & Ethnicity

Source: U.S. Census Bureau – 2000 Decennial Census, 2010 Decennial Census, 2013 1-Year ACS Estimates

Fig. 2.2 Population Growth by Neighborhood, 2000-2013

Source: U.S. Census Bureau – 2000 Decennial Census, 2013 5-Year ACS Estimates

Households

The number of Portland households increased by more than 29,000 between the year 2000 and 2013.

The city experienced an overall household growth rate of 13.1%, with single-person households increasing by 12.7% and households with children increasing by 7.6%.

Similar to population growth, the Central City saw some of the most significant growth in the number of households. In contrast to population growth, the Central City household growth was nearly double that of any other neighborhood area. These two data points suggest that household growth in East Portland neighborhoods consists of significantly larger household sizes. Beyond the Central City, household growth is somewhat more evenly distributed in north, northeast, outer east, and southeast neighborhoods of the city than population growth.

Growth in Number of Households by Neighborhood 2000-2013

Fig. 2.3 Number of Households

Source: U.S. Census Bureau – 2000 Decennial Census, 2010 Decennial Census, 2013 1-Year ACS Estimates

Fig. 2.4 Household Growth by Neighborhood, 2000-2013

Source: U.S. Census Bureau – 2000 Decennial Census, 2013 5-Year ACS Estimates

Income

After adjusting for inflation, Portland shows meager growth in median household income between the years 2000 and 2013. As of 2013, the median household income was \$55,571. Real median income levels have increased among homeowners since 2000 and after the post-recessionary period in 2010, while renter households have seen their economic position weaken. The median homeowner income in 2013, at \$79,622, was over two times as high as the median renter income of \$35,986.

The rebounding of post-recessionary wages among White households has not been shared, and inflation-adjusted incomes continue to fall among Communities of Color. Beyond the absence of a shared recovery, Communities of Color continue to experience disproportionately lower median income levels than that of all Portland households. The median White household income in 2013 was \$59,758, while the majority of Communities of Color experienced a median income between \$22,000 and \$36,000.

Change in Median Income by Neighborhood 2000-2013

Fig. 2.5 Median Household Income by Housing Tenure (2013 Adjusted \$)

Fig. 2.6 Median Household Income by Race & Ethnicity (2013 Adjusted \$)

Source: U.S. Census Bureau – 2000 Decennial Census, 2010 Decennial Census, 2013 1-Year ACS Estimates

Homeownership

Portland’s 53% homeownership rate is relatively high compared with other cities of similar size and character. Nonetheless, the city has experienced a small but steady decline in the proportion of the population that occupies an owned home since the year 2000.

Similar to incomes, Communities of Color experience a disproportionately low homeownership rate when compared to White households or the population as a whole.

Asian and Hispanic-Latino households have experienced post-recessionary declines in homeownership at more substantial rates than the total population or White households.

African American and Native American households showed increases in homeownership rates between 2000 and 2013. However, when paired with income, affordability, and population trends, this data may reflect that many African American and Native American renter households are, in fact, being priced out of Portland, rather than true increases in homeownership in these communities.

Homeownership Rate by Neighborhood 2013

Fig. 2.7 Homeownership Rate by Race & Ethnicity

Source: U.S. Census Bureau – 2000 Decennial Census, 2010 Decennial Census, 2013 1-Year ACS Estimates

Fig. 2.8 Change in Rate of Homeownership by Neighborhood, 2000-2013

Source: U.S. Census Bureau – 2000 Decennial Census, 2008-2013 5-Year ACS Estimates

Racial Diversity

The change in diversity between neighborhoods, as measured by the change in the proportion of the population that is non-White, between 2000 and 2013 illustrates a significant shift in the racial composition of the city.

Communities of Color are increasingly moving to Outer East and Southeast Portland. North and Northeast Portland have experienced a significant decline in the proportion of the population that consists of Communities of Color since the year 2000.

When examined in the context of the income and affordability data presented in other sections of this report, the change in racial diversity reinforces that many households from Communities of Color are being priced out of neighborhoods in close proximity to the Central City.

Source: U.S. Census Bureau – 2000 Decennial Census, 2013 5-Year ACS Estimates

Change in Racial Diversity by Neighborhood 2000-2013

Homelessness

In 2015, 2,759 people were homeless at a point-in-time in Portland and Multnomah County, a rate of 35.89 per 10,000 people in the general population. The Point-in-Time Count is a tally of sheltered and unsheltered homeless persons on a single night in January. HUD requires that communities conduct an annual count of homeless persons in emergency shelter or transitional housing (time-limited housing with services for people exiting homelessness). Communities must also conduct a count of unsheltered homeless persons every other year (odd numbered years). Each count is planned, coordinated and carried out locally.

People of color are over-represented within the homeless population compared with the general population of Portland and Multnomah County. The extent of the over-representation varies by community. All communities of color except Asians are over-represented, with the greatest levels of over-representation occurring among Native Americans and African Americans.

Section 2

Housing Stock & Production

The number of housing units citywide continues to increase, with multifamily developments representing the bulk of new additions to the city stock.

While single-family and multifamily development have increased in recent years, annual production has not yet reached pre-recessionary levels. That said, multifamily permitting in 2013 and 2014 were at all-time highs. Assuming the majority of these go on to be built, production levels will soon surpass those in the early 2000s. In contrast, the number of single-family permits issued in 2013 and 2014, are still well below the early 2000s.

Multifamily production was concentrated in the neighborhoods surrounding the Central City and permitting was concentrated in the Central City. Single-family production and permitting, instead, were concentrated in Interstate Corridor, Lents-Foster, MLK-Alberta, and St. Johns.

Production Totals

Portland continues to experience increases in the number of housing units in the citywide stock, with 686 single-family units and 1,828 multifamily units added in 2014. As has been the trend for more than a decade, new additions to the city stock are increasingly focused on multifamily development. In 2014 the composition of housing stock in Portland consisted of 152,822 single-family homes and 120,177 multifamily homes.

While the addition of single-family and multifamily housing units has increased in recent years, annual production levels have not yet reached pre-recessionary levels.

Production Totals, cont.

Multifamily

While multifamily production has not yet reached pre-recessionary levels, multifamily permitting in 2013 and 2014 were at all-time highs. 2,619 multifamily permits were issued in 2013 and 4,236 multifamily permits were issued in 2014. Assuming the majority of these go on to be built, production levels will soon surpass those in the early 2000s.

Single-Family

Similar to multifamily production, single-family production is well below pre-recessionary levels. In contrast to the multifamily market, the number of single-family permits issued in 2013 and 2014—at 815 and 886 respectively—are still well below the early 2000s.

Production by Neighborhood

Multifamily

Multifamily production in 2014 was concentrated in the neighborhoods surrounding the Central City.

Northwest, Interstate Corridor, Belmont-Hawthorne-Division, and St. Johns saw the bulk of new multifamily units added to the city housing stock.

Multifamily permitting in 2014 was substantially concentrated in the Central City with nearly 1,800 new permits issued. In addition to the Central City, construction and production is expected to continue in Northwest and Interstate Corridor as over 1,100 permits were issued between the two neighborhoods.

Multifamily Permitting 2014

Production by Neighborhood, cont.

Single-Family

Single-family production in 2014 was concentrated in Interstate Corridor, Lents-Foster, MLK-Alberta, and St. Johns. In addition, most neighborhoods in the city experienced a minimal level of single-family production over the course of the year.

Single-family permitting in 2014 has been relatively distributed throughout most neighborhoods in the city, with more substantial permitting continuing in Interstate Corridor, Lents-Foster, MLK-Alberta, and St. Johns. In addition, Woodstock and Montavilla have experienced higher levels of permitting that may yield higher numbers of single-family production.

Household Profile

A household type to show how rental affordability varies among different populations in Portland.

Household Data

Currently available data for each household type.

Data Source: ACS 2013 1-Year Estimates

Affordability Estimates

Average Q3 rent for 2014 and 2015, and estimates of the affordability of multifamily rental units for each neighborhood by unit type. Affordability was determined according to whether or not the average rent for a type of unit in a neighborhood exceeded 30% of the median income for the given household type (not including utilities).

Data Source: ACS 2013 1-Year Income Estimates and Costar 2015 Multifamily Residential Market Survey Data

Change in Rental Prices 2014 to 2015

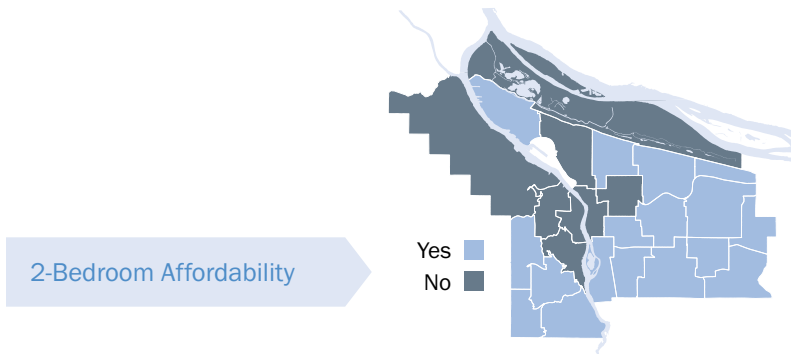

Since the third quarter of 2014, Portland rents have increased an average of 8 - 9%—or roughly \$100 per month over the previous year. This overall increase has not been felt equally throughout the city, with changes in rents varying by neighborhood. The Central City, Northwest Portland, and South Portland-Marquam Hill are currently the least affordable neighborhoods in the city to rent a two-bedroom apartment, while 122nd-Division and Centennial-Glenfair-Wilkes are currently the most affordable. In the last year, many neighborhoods in Southeast and Outer Southeast Portland experienced some of the highest increases in rental rates for two-bedroom units, significantly reducing affordability for many households in what has historically been an affordable area of the city.

Household Profile

A household type to show how homeownership affordability varies among different populations in Portland.

Household Data

Currently available data for each household type.

Data Source: ACS 2013 1-Year Estimates

Affordability Estimates

Median home sales price and estimates of homeownership affordability by neighborhood. Monthly cost estimates include mortgage and insurance costs only. Affordability was determined according to whether or not the homeownership cost exceeded 30% of the median income for the given household type, not including taxes or utilities.

Data Source: ACS 2013 1-Year Income Estimates, PHB, and RMLS 2015

Change in Home Sales Price 2011 to 2014

Between 2011 and 2014, the median home sales price in Portland rose 32%—an increase of roughly \$75,000 in the price of buying a home. The most significant change in home prices occurred in Lents-Foster, where the median sales price rose 61% during that time (although the median sales price for the neighborhood remains well below the citywide level). The neighborhoods with the least affordable median home sales prices are Forest Park-Northwest Hills and Hollywood, while Centennial-Glenfair-Wilkes, 122nd-Division, and Gateway are the most affordable neighborhoods in the city to purchase a home.

Portland Homeownership Affordability: Change in Median Home Sales Price, 2011 to 2014

Neighborhood	2014 Median Home Sales Price	% +/-
Portland	\$310,000	+31.91%
122nd-Division	\$184,500	+38.2%

Guide to Neighborhood Profiles

Neighborhood

Area of the city being profiled in the data summary.

Population and Income

Neighborhood population, median household income, and poverty rate by race and ethnicity in the years 2000 and 2013.

Neighborhood households (all, single and with children), foreign-born individuals, persons experiencing disabilities, and seniors in the years 2000 and 2013.

Housing Stock and Production

Neighborhood housing stock disaggregated into single-family and multifamily units, regulated affordable housing units, and production values through single-family and multifamily permitting data in the years 2000, and 2010 to 2014.

Housing Market and Affordability

Estimates of the rental affordability of multifamily rental units in Portland neighborhoods by unit type. Average rent and vacancy rate data assessed through market survey analysis. Affordability assessed through a comparison test on whether the average rent exceeded 30% of that household's median income.

Estimates of the homeownership affordability in Portland neighborhoods. Median home sales prices assessed through RMLS. Monthly homeownership cost estimates based on mortgage and insurance cost. Affordability assessed through a comparison test on whether the homeownership cost exceeded 30% of that household's median income.

Policy Targets

1980 Comprehensive Plan

Geography	Citywide
Year Established	1980
Year Complete	Ongoing Until Update
Plan Version	Comprehensive Plan Goals and Policies; Complete November 2011 Ordinance No. 150580, Ordinance No. 172954

Target
NOT MEETING

Achieve a distribution of household incomes similar to the distribution of household incomes found citywide, in Central City, Gateway Regional Center, in town centers, and in large redevelopment projects.

Both Central City and Gateway Regional Center have a greater proportion of residents earning below median income as compared to the citywide average. Central City has a particularly higher number of residents earning 0-30% MFI.

Target
MEETING

Encourage housing opportunities for extremely low and very low-income households (below 50% MFI) in all neighborhoods to avoid their concentration in any one area.

The City currently maintains regulated affordable housing units in all neighborhoods.

Target
MEETING

Actively encourage the dispersal of housing with on-site social services throughout the city.

The City currently maintains regulated affordable housing projects with on-site social services.

Target
NOT MEETING

Expand homeownership opportunities for existing residents in neighborhoods with homeownership rates lower than the regional average.

City of Portland homeownership programs do not currently operate citywide.

Target
MEETING

Expand multi-dwelling and rental housing opportunities in neighborhoods with homeownership rates higher than the regional average.

The City currently maintains regulated affordable housing units in all neighborhoods.

Target
MEETING

Support programs that increase opportunities for minorities, low-income people, and people in protected classes to gain access to housing throughout the region.

Implemented through the Housing Bureau equity policies.

City Plan

A City of Portland planning/policy document that establishes affordable housing policy targets, and the associated geographic area.

Policy Targets

Defined and measurable affordable housing goals established within the document, as well as the timeframe, current status, and progress toward reaching the goal.

1980 Comprehensive Plan cont.

Target

MEETING

Work in partnership with the Housing Authority of Portland to preserve its portfolio of federally assisted housing at rent levels affordable to extremely and very low-income households.

The City actively works with Home Forward to support the preservation of expiring federally assisted affordable housing projects.

Target

NOT MEETING

Pursue adequate financial resources to develop, maintain and preserve housing and housing assistance programs for households whose needs are not met by the housing market.

Existing resource forecasts and regulatory mechanisms are insufficient to meet City production targets.

Target

NOT MEETING

Promote the preservation and development of a sufficient supply of transitional and permanent housing affordable to extremely low-income individuals and households with children in order to reduce or prevent homelessness.

The existing supply of transitional and permanent affordable housing for extremely low-income individuals and households is currently insufficient to meet demand.

Target

MEETING

Provide opportunities throughout the city for emergency shelters and transitional housing for people who are homeless.

The City currently maintains emergency shelters and transitional housing programs throughout the city.

Target

MEETING

Stimulate production of a variety of housing types that are affordable and responsive to the needs of very low, low, moderate, and middle-income households.

The City currently funds a variety of affordable housing projects in response to various needs throughout the community.

Central City Policy Targets

Guide to Central City Policy Targets

Policy Targets

Central City 2035: Concept

Geography	Central City
Year Established	2012
Year Complete	2035
Plan Version	Central City 2035 Concept Plan October 2012 Resolution No. 36970

Target → Preserve and add to the existing affordable housing supply of the Central City to maintain and grow the racial, ethnic and economic diversity of the Central City.

MEETING

In 2012 the City maintained 5,877 units of regulated affordable housing in the Central City. This number has increased to 7,100 in 2015.

Target → Continue to develop new affordable housing in the Central City so that approximately 30% of the total housing in the Central City is affordable to households between 0% and 80% MFI.

MEETING

The City currently maintains 7,100 regulated affordable units below 80% MFI in the Central City and a market survey estimates 2,100 market rate units below 80% MFI for a total of 9,200 or 36% of the total housing in the Central City.

Target → Increase the supply of housing affordable to working households in the 50% to 80% MFI bracket, households for whom the Central City's access to jobs and transit can be particularly beneficial.

MEETING

The City currently maintains tax exemption programs to incentivize the development of regulated affordable rental housing up to 80% MFI and provide financing to incentivize the development of regulated affordable rental housing up to 60% MFI.

Target → For public affordable housing resources, prioritize funding for housing programs and investment to meet the unmet needs of extremely low and very low-income households (0-50% MFI).

MEETING

The City currently targets its financial resources for affordable rental housing at households earning up to 60% MFI.

Central City Plan

A City of Portland planning/policy document that establishes affordable housing policy targets, and the associated geographic area.

Policy Targets

Defined and measurable affordable housing goals established within the document, as well as the timeframe, current status, and progress toward reaching the goal.

Resolution No. 36970

Target

Preserve and add to the existing affordable housing supply of the Central City to maintain and grow the racial, ethnic and economic diversity of the Central City.

MEETING

In 2012 the City maintained 5,877 units of regulated affordable housing in the Central City. This number has increased to 7,100 in 2015.

Target

Continue to develop new affordable housing in the Central City so that approximately 30% of the total housing in the Central City is affordable to households between 0% and 80% MFI.

MEETING

The City currently maintains 7,100 regulated affordable units below 80% MFI in the Central City and a market survey estimates 2,100 market rate units below 80% MFI for a total of 9,200 or 36% of the total housing in the Central City.

Target

Increase the supply of housing affordable to working households in the 50% to 80% MFI bracket, households for whom the Central City's access to jobs and transit can be particularly beneficial.

MEETING

The City currently maintains tax exemption programs to incentivize the development of regulated affordable rental housing up to 80% MFI and provide financing to incentivize the development of regulated affordable rental housing up to 60% MFI.

Target

For public affordable housing resources, prioritize funding for housing programs and investment to meet the unmet needs of extremely low and very low-income households (0-50% MFI).

MEETING

The City currently targets its financial resources for affordable rental housing at households earning up to 60% MFI.

Central City 2035: Concept cont.

Target

Provide housing and services that directly assist at-risk populations and allow people to transition to more stable living conditions.

MEETING

The City currently provides housing assistance, transitional housing, and shelter housing to between 13,000 and 14,000 individuals each year.

Target

NOT MEETING

Align plans, investments and other policy tools to support improving homeownership rates and location choice for people of color and other groups who have been historically under-served and under-represented in the Central City.

The City does not currently administer homeownership programming in the Central City.

Target

MEETING

Develop a diversity of housing types compatible with the needs of families with children, students, seniors and special needs residents.

The City currently funds a variety of affordable housing projects in response to various needs throughout the community.

Target

MEETING

Incent increased participation of private sector in participating in strategies to increase supply of workforce, student and senior housing in and near Central City.

The City currently administers tax and fee exemption programs, as well as gap financing programs, to incentivize affordable housing in and near Central City.

Central City 2035: SE Quadrant

Geography Central City, SE Quadrant
Year Established 2015
Year Complete 2035
Plan Version *Central City 2035 SE Quadrant Plan,
July 2015
Resolution No. 37147*

- Target** Update the Central City Housing Inventory by 2016 and conduct periodic updates on a regular basis.
MEETING *The City now reports on the housing stock, production, and affordability on an annual basis.*
- Target** Pursue opportunities for affordable housing and well as mixed-income housing projects within the Clinton Station area, with a focus on lands currently owned by the City of Portland.
NOT MEETING *Affordable housing programming within the Clinton Station area is not yet under development.*
- Target** Develop a sustainable source(s) of funding to create and preserve affordable housing throughout the Central City that aligns with geographic scope and time horizon of the City's affordable housing goals.
NOT MEETING *Existing resource forecasts and regulatory mechanisms are insufficient to meet City production target.*

Central City 2035: West Quadrant

Geography Central City, West Quadrant
Year Established 2015
Year Complete 2035
Plan Version Central City 2035 West Quadrant Plan
March 2015
Resolution No. 37115

- Target**
NOT MEETING
Develop and implement an affordable housing strategy for the West End that preserves or replaces existing affordable housing, including buildings that are privately owned.
West End affordable housing preservation strategy not yet developed.
- Target**
NOT MEETING
Restructure FAR bonus system to increase affordable housing production including family friendly units.
Voluntary inclusionary zoning programs are under development.
- Target**
MEETING
Create incentives and programs to increase affordable housing that supports families.
The City currently uses gap financing and tax and fee exemption programs to incentivize family supported regulated affordable housing development.
- Target**
MEETING
Provide a housing tax abatement program for Old Town/China Town.
The City currently maintains a tax exemption program that can be utilized in Old Town/China Town.
- Target**
MEETING
Implement incentives that encourage new housing in the Naito Parkway/riverfront area.
The City expanded the capacity and modified requirements of the Multiple Unit Limited Tax Exemption program (MULTE) to increase participation by private developers. All properties along the Naito Parkway/riverfront area are within the MULTE eligible boundary.

Central City 2035: N/NE Quadrant

Geography Central City, N/NE Quadrant
Year Established 2012
Year Complete 2035
Plan Version *Central City 2035 N/NE Quadrant Plan
October 2012
Resolution No. 36972*

- Target**
NOT MEETING
Develop regulatory tools to encourage housing development and the inclusion of affordable housing.
Voluntary inclusionary zoning programs are under development.
- Target**
MEETING
Develop affordable rental housing through investment of TIF Set Aside funds and other programs.
Tax Increment Financing Set-Aside for Affordable Housing Policy dedicates, at a minimum, 30% of all increment funds to affordable housing.
- Target**
NOT MEETING
Support connections between district employers and employee housing within the district through employer-assisted housing programs and coordinated mixed-use development, particularly employer-assisted housing for service level workers employed within the district.
The City does not currently administer employer-assisted housing programming.

Central City No Net Loss

Geography Central City
Year Established 2001
Year Complete No end date
Plan Version City Council Resolution 36021

Target The City of Portland will maintain no less than 8,286 rental housing units affordable to households who earn from 0-60% of the median family income within Central City.

NOT MEETING

When adopted in 2002, the City estimated 8,286 rental units in the Central City were affordable to households earning less than 60% of the median family income. A recent survey identified 6,594 rent-regulated units and 267 market-rate units affordable at 60% MFI. While the number of regulated affordable units has increased by 1,204 units since 2002, the Central City has seen continued loss of affordability in market-rate units. The majority of affordable units in both regulated and market-rate properties are smaller units serving one- and two-person households. Family-sized affordable units are limited.

No Net Loss Rental Housing Units, 0-60% MFI	Regulated Units		Market Units		Total Units	
	2002	2015	2002	2015	2002	2015

1988 Central City Plan

Geography Central City
Year Established 1988
Year Complete 2012
Plan Version 1988 Central City Plan
Ordinance No. 160606, Resolution No. 34417

Target
NOT MEETING

Housing Trust Fund supported by special purpose levy, established specifically to meet capital costs for acquisition and rehabilitation but also to provide operating funds for such activities as voucher program.

The City does not currently maintain a special purpose levy for affordable housing.

Target
MEETING

Housing Trust Fund supported by tax increment funds committed to acquisition and rehabilitation in the Central City's renewal areas.

Tax Increment Financing Set-Aside for Affordable Housing Policy dedicates, at a minimum, 30% of all increment funds to affordable housing.

Target
NOT MEETING

Housing Trust Fund supported by a real estate title transfer tax or fee which will provide operating and rent subsidy support on an ongoing basis.

State law prohibits municipal governments from imposing transfer taxes, fees, or assessments on real estate.

Target
MEETING

Housing incentives including the formation of urban renewal districts and use tax increment financing to support housing and related improvements.

Tax Increment Financing Set-Aside for Affordable Housing Policy dedicates, at a minimum, 30% of all increment funds to affordable housing.

Target
MEETING

Housing incentives including the extending the ten-year limited property tax exemption for the value of the housing improvements to the entire Central City area.

The City administers tax exemption programs for multifamily and single-family affordable housing.

Target
NOT MEETING

Housing incentives including using tax exempt revenue bonds for permanent financing of housing.

The city does not currently use tax exempt revenue bonds for affordable housing.

1988 Central City Plan cont.

Target

Housing incentives including using eminent domain to assemble sites for housing development.

NOT MEETING

The City does not currently use eminent domain for affordable housing.

Target

Housing incentives including using transferring title of City-owned lands to housing developers to indirectly write down the cost of land on which housing is to be built.

MEETING

The City regularly uses the disposition of City-owned land to incentivize the development of affordable housing.

Target

Housing incentives including subsidizing the delivery of city infrastructure to sites on which housing is being developed.

MEETING

The City regularly subsidizes infrastructure through system development charge waiver programs as well as master planned site incentives.

Target

Create FAR and height bonuses for projects which include housing.

NOT MEETING

The City does have an FAR bonus program for affordable housing, as well as market-rate housing, but the affordable housing bonus program is not used. Updates to the bonus program are currently underway.

Target

Waive development fees for projects that include housing, or for the housing portion of a mixed-use project.

MEETING

The City regularly uses development fee waivers to incentivize affordable housing development.

Target

Establish a City housing expeditor to aid in the development approval process and to process and assemble incentive packages.

NOT MEETING

The City does not currently maintain housing expeditors.

Target

Subsidize operating expenses of housing development, such as water and sewer charges.

NOT MEETING

The City does not currently subsidize operating expenses for affordable housing developments.

Target

Use general obligation bonds in urban renewal districts as an alternative to, or an addition to, tax increment financing.

NOT MEETING

The City does not currently use general obligation bonds for affordable housing.

Rental Housing

Guide to Rental Housing

Asset Portfolio

All rental units with affordability regulated by the City of Portland (ie: where the City has an affordability regulatory agreement in place with the property owner). These rental units have received some form of financial, tax, or regulatory subsidy from the City of Portland and in return are required to maintain a level of affordability that is linked to median family income levels. The length of time that units must remain affordable under the conditions of the agreement varies based on the type of subsidy received.

City Regulated Affordable Rental Units

The number of affordable rental units regulated by the City of Portland in total and at each level of affordability. Levels of affordability reflect the income levels at which the unit rents are capped (30%, 40%, 50%, 60%, or 80% of the median family income).

Financing

The City of Portland offers many forms of financial, tax, or regulatory subsidy (federal and local) to private and nonprofit organizations for the development of regulated affordable housing. This data disaggregates the number of regulated affordable units that were developed based on the combination of subsidies received.

Regulated Rental Unit Production

The number of regulated affordable units added to the City of Portland's asset portfolio by year, disaggregated by the income levels at which rent is capped and categorized as new construction or preservation/rehabilitation. Units are counted in the asset portfolio when construction is complete and the units are move-in ready. Before completion, they are counted in the pipeline.

All Buildings

The City of Portland maintains an asset portfolio of housing projects that are made affordable through public subsidies from the City. A legal agreement with the property owner accompanies any direct investment of public funds by the City, or the use of tax credits, exemptions, and other public funding tools for the development or preservation of affordable housing. This agreement regulates the rent levels of the subsidized units for a defined period of time—as long as 60 years in projects that receive direct financing—and necessitates ongoing compliance monitoring by the City for the life of the agreement, as well as physical maintenance on the buildings themselves.

The City provides funding to nonprofit and for-profit developers to support the construction of new rental housing for targeted income levels, or the renovation (“preservation”) of existing affordable rental housing, most commonly acting as a “gap lender” to provide the additional funds that cannot be obtained from conventional lenders because the projected rent income from low-income tenants doesn’t support higher debt payments. Resources for affordable housing investment

include federal funding that has been allocated to the City, such as CDBG and HOME funds, as well as local sources, such as Tax Increment Financing generated from urban renewal areas. Beyond capital investments, the City also promotes affordability in market rate housing through tax and development fee exemptions. These projects are also included in the City’s asset portfolio.

The City of Portland is one of many sources of financing used by affordable housing developers. Private equity investment through federal Low-Income Housing Tax Credits programs administered by the State, local property tax abatements, and federal Project Based Section 8 vouchers all allow affordable housing projects to achieve a deeper level of affordability than basic financing alone. Not all of these sources are available to each project and most affordable housing projects utilize the best combination of development and operating subsidies available to build or preserve housing for low-income households.

Built in 1982, the ten-story 1200 Building provides 89 affordable one-bedroom units in close proximity to the transit options and amenities of Portland’s South Park Blocks. Building features include 6,300 square feet of ground-floor commercial space, a laundry room, a recreation room with a kitchen, tenant lounge areas, an outdoor garden terrace deck, and a newly installed eco roof. Nine units located on the second floor are reserved for disabled tenants and offer additional square footage for improved accessibility.

In 2008, the 1200 Building was one of 11 privately owned properties facing expiring federal subsidies that were identified by the City as being at risk of losing affordability. A City of Portland campaign, called 11 x 13, launched the same year in an effort to preserve the affordability of all 11 buildings by 2013 and prevent the displacement of more than 700 vulnerable tenants, many of whom are seniors, disabled, and earning very low incomes.

Extensive rehabilitation of the 1200 Building began in 2012, and included renovation of all common areas and elevator cabs, construction of a senior health services facility for residents, upgrades to units including new appliances and water heaters, improved access in disabled units, and new exterior paint. Through the City’s investment in the rehabilitation of the 1200 Building, the affordability of all 89 units was extended another 60 years—through 2073.

When Gray's Landing opened its doors in 2013, the studios, one-bedroom and two-bedroom apartments offered the first affordable housing in Portland's emerging South Waterfront neighborhood. All but one of the 210 units within the six-story building are restricted to households earning no more than 60% of the Median Family Income—42 of those give priority to Veterans with incomes at or below 30% of the median.

Rental assistance for the Veterans units comes from the U.S. Department of Housing and Urban Development (HUD) Section 8 program, with services and program administration through the Veterans Affairs Supportive Housing (VASH) program. The VA Portland Health Care System provides clinical services to the building's VASH participants through an office space located on-site.

The 21,000 square feet of commercial space on the ground floor were purchased by REACH CDC for administrative offices, and include retail space and commercial parking. A substantial community room also provides an activity space, a computer lab, and resident services.

The location of Gray's Landing near the terminus of the North/South Streetcar line gives residents a unique opportunity to take advantage of the South Waterfront's numerous transit options. Through a partnership with TriMet, tenants receive no-cost transit passes in exchange for a rest stop that is provided to TriMet drivers in the building.

The Vista de Rosas complex in Northeast Portland is comprised of four two-story apartment buildings and a commercial building currently being used as a community space.

The rehabilitation of Vista de Rosas was the second phase in a multi-phase tear-down of 178 units at Villa de Clara Vista, which began in 2004. In this phase, 25 units ranging in size from 1 - 4 bedrooms were substantially rehabilitated, joining the 44 Clara Vista Townhomes constructed during phase one. Fifteen of these newly rehabilitated units have two or more bedrooms to accommodate families.

The scope of work in the rehabilitation of Vista de Rosas included replacing the building envelope, appliances, cabinets, floor coverings, heaters, fans and plumbing fixtures, and the addition of a new community laundry facility.

All of Vista de Rosas' tenants have incomes at or below 60% of the Median Family Income (MFI), with the majority earning between 40% and 50% of MFI.

Affordable single-family rental homes are an effective anti-displacement tool that serve to eliminate concentrations of poverty and stabilize communities. In the fall of 2012, Portland Community Reinvestment Initiatives (PCRI) partnered with the Portland Housing Bureau to rehabilitate 11 vacant homes across Portland that were in prime locations near parks, community resources, and public transportation. The homes, which span eight diverse neighborhoods, had all been built before 1944—some were more than 100 years old and several had been vacant as long as six years.

In addition to necessary structural improvements, other upgrades that took place during the rehabilitation enhanced energy efficiency and indoor health, and new paint addressed the lead-based paint hazards common in older homes.

Extensive moisture damage required a complete demolition of the last property, called Highland House. During redevelopment, the single-story two-bedroom house located in Northeast Portland was replaced with a larger two-story home. The new floor plan has four bedrooms and a main floor designed for residents with mobility impairments to accommodate the needs of a larger or extended family.

Section 2

Homeownership

Guide to Homeownership

Loan Portfolio

Homeownership

The City of Portland makes loans for down payment assistance to help low-income households access first-time homeownership, and for home repair assistance that helps current homeowners retain their homes. These loans are secured with liens recorded against the property to ensure compliance with the loan terms, which vary depending on funding source and the policy objective at the time the loan was issued. Since 2010, the City has executed homeownership and home repair loans that require no payment, accrue no interest, and are generally repaid to the City through escrow, and only if the home is sold before the period specified by the loan term. Loan terms were structured this way to maximize the potential financial stability for low-income households accessing homeownership or striving to retain their homes.

In addition to loan programs, the City funds a wide continuum of programs and services to assist low-income households access and retain homeownership. The City leverages partnerships with community-serving organizations to reach underserved populations with education and counseling programs to create mortgage-ready households, support for first-time homebuyers, and foreclosure prevention assistance.

The City also administers the Mortgage Credit Certificate (MCC) program, a federal income tax credit that increases the buying power of first-time homebuyers by reducing their federal income tax obligation.

Programming to improve the health and livability of owned homes, such as grants up to \$10,000 for structural repairs, weatherization assistance, and accessibility upgrades, as well as assistance to mitigate lead-based paint hazards, are shown to increase retention rates among homeowners.

The City also works to increase the number of affordable homes available to low-income buyers. Developers are eligible to receive System Development Charge exemptions and property tax exemptions through the City when they agree to sell homes below a restricted price cap to an income-qualified buyer.

Many of these programs can be combined to maximize the ability of low-income, first-time homebuyers to realize the many benefits of homeownership.

Loan Portfolio

All current single-family homeownership and home repair loans issued by the City of Portland (documented by an affordability covenant or lien on individual properties) to individual households to support homeownership access or retention. The terms of the loan vary based on the instrument used.

Homeownership Loans by Financing Instrument

The number of loans within the loan portfolio by loan type and income level of the household served (shown as a percentage of the median family income).

Homelessness

Guide to Homelessness

Program Demographics

Homelessness

The City of Portland funds programs designed to prevent and end homelessness for individuals and families. These programs are provided through contracts with various nongovernmental and other public entities, who perform a range of services that address the diverse needs of people experiencing homelessness. These services include short-term rent assistance, eviction prevention and housing placement, emergency shelter, and transitional housing. The local effort to end homelessness is carried out under the umbrella of A Home for Everyone, a collaborative effort by Multnomah County, the City of Portland, the City of Gresham, Home Forward, and other community partners.

Methodology

Part 1.01 Population, Households, and Income

Population, household, income, homeownership, and racial composition data derived from the 2000 Decennial Census, the 2010 Decennial Census, the 2013 1-year estimates from the American Community Survey, and the 2008-2013 5-year estimates from the American Community Survey—tables B01003, B02008, B02009, B02010, B02011, B02012, B03003, B05012, B11005, B11016, B17020, B19001, B19019, B19019, B19113A, B19113B, B19113C, B19113D, B19113E, B19113I, B19049, B19126, B25119, B25003, B25003A, B25003B, B25003C, B25003D, B25003E, B25003I, B25070, B25118, B25119, DP-1, DP02, DP03, DP05, H014, H016H, HCT012, P011, P015, P021, P053, P087, QT-H13, QT-P5, QT-P10, QT-P20, QT-P21, QT-P24, and S1901.

Part 1.02 Housing Stock and Production

Multifamily and single-family data derived from Multnomah County Tax Lot data. Multifamily and single-family permitting data derived from the Bureau of Planning and Sustainability and Bureau of Development Services permitting data.

Part 2.01 Rental Housing Market Affordability

Household profile data derived from the 2008-2013 American Community Survey – tables S1901, B19019, B19113A, B19113B, B19113C, B19113D, B19113E, B19113I, B19049, and B19126. A 30% share of an equal monthly proportion of the annual median household income data was derived to measure against market rent data. Market rent data derived from the CoStar Multifamily Residential Market data set. Rent data referenced the average 3rd quarter monthly asking rent for 2014 and 2015.

Part 2.02 Homeownership Market Affordability

Household profile data derived from the 2008-2013 American Community Survey—tables S1901, B19019, B19113A, B19113B, B19113C, B19113D, B19113E, B19113I, B19049, and B19126. A 30% share of an equal monthly proportion of the annual median household income data was derived to measure against market home sales data. Median home sales data derived from the Regional Multiple Listing Service data set. Home sales data reference the median home sales price in years 2000 through 2014.

Part 3 Neighborhood Profiles

Neighborhood analysis areas derived from the Bureau of Planning and Sustainability and the Portland Plan 20-Minute Neighborhood areas. Boundary lines have been adjusted to align with the closest census tract/block group/block boundary to minimize margin of error in data analysis.

Part 4.01 Citywide Policy Targets

Citywide policy targets derived from the 1980 Comprehensive Plan Goals and Policies November 2011 version. Housing Bureau staff assessed the planning documents for goals, policies, objectives, etc. that were proximally associated with affordable housing. Housing Bureau staff then determined the affordable housing goals, policies, objectives, etc. for those which had a relatively objective method for assessing progress and those were included as citywide policy targets. Multiple sources of data and information were utilized by staff to determine if the City is currently meeting or not meeting the policy targets.

Part 4.02 Central City Policy Targets

Central City policy targets derived from the Central City 2035 Concept Plan October 2012 version, the Central City Southeast Quadrant Plan July 2015 version, the Central City 2035 West Quadrant Plan March 2015 version, the Central City 2035 N/NE Quadrant Plan October 2012 version, City Council Resolution 36021, and the 1988 Central City Plan. Housing Bureau staff assessed the planning documents for goals, policies, objectives, etc. that were proximally associated with affordable housing. Housing Bureau staff then determined the affordable housing goals, policies, objectives, etc. for those which had a relatively objective method for assessing progress and those were included as citywide policy targets. Multiple sources of data and information were utilized by staff to determine if the City is currently meeting or not meeting the policy targets.

Part 4.03 Urban Renewal Area Policy Targets

Urban Renewal Area policy targets derived from the Central Eastside Urban Renewal Area Housing Strategy 2003 version, the Downtown Housing Inventory and Policy Analysis 2000 version, the Gateway Regional Center Housing Strategy 2003 version, the ICURA Housing Strategy 2002 version, the Lents Town Center Housing Strategy 2000 version, the North Macadam Housing Development Strategy 2003 version, the Lloyd District Housing Strategy 2002 version, and the River District Housing Implementation Strategy June 1999 version. Housing Bureau staff assessed the planning documents for unit production goals, policies, objectives, etc. that were associated with affordable housing and those were included as citywide policy targets. Multiple sources of data and information were utilized by staff to determine if the City is currently meeting or not meeting the policy targets.

Part 5.01 Rental Housing

Regulated affordable rental unit data derived from Portland Housing Bureau asset portfolio data sets. Regulated affordable rental unit counts are added to the production pipeline in various stages based on whether the project is under review, in pre-development, or under construction. Regulated affordable rental units shift from being reported in the production pipeline to being counted in the asset portfolio when construction is in final stages/complete and units become move-in ready.

Part 5.02 Homeownership

Homeownership data derived from Portland Housing Bureau single-family loan portfolio data sets and program outcome data sets.

Part 5.03 Homelessness

Homelessness data derived from Portland Housing Bureau program outcome data sets.

Part 6 Funding

Historical budget data, current budget data, and forecasting data derived from point in time analyses by the finance and accounting staff at the Portland Housing Bureau.
