1. EXECUTIVE SUMMARY

Coles + Betts Environmental Consulting, Inc. (C+BEC) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations set forth by Prosper Portland (the Client), for the vacant city block located northwest of the intersection of N Williams Avenue and N Russell Street, Portland, Multnomah County, Oregon (the "Subject Property" or "Property").

The Phase I ESA was prepared to provide the Client with an assessment concerning environmental conditions (limited to those issues identified in the report), as they exist on the Subject Property. This assessment was conducted using the degree of care and skill ordinarily exercised by environmental science professionals in the evaluation of environmental conditions and in accordance with the American Society of Testing Materials (ASTM) *E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*.

The Property is owned by Legacy Health System and consists of a vacant city block and the southern half of N Knott Street. There is one catch basin in N Knott Street at the northwest corner of the Property and it discharges to the municipal stormwater system below N Vancouver Avenue. There are no drywells registered for the Property in the DEQ Underground Injection Control database, and evidence of drywells was not observed during the site reconnaissance.

The Property's historical operations include dry cleaners, auto station, cattle and insect powder manufacturing, paints and wallpaper, tinning, and miscellaneous manufacturing activities. Former buildings may have had heating oil above-ground storage tanks and/or underground storage tanks, and petroleum fuel stored in underground storage tanks. Legacy Health has owned and operated the Property since the 1970s. Distressed vegetation was observed in historical aerial photographs and during the site reconnaissance.

The adjacent parcels are used for commercial or residential purposes. Residences are located to the east and south. Commercial buildings are located south of the Property, and the Legacy Health System campus surface parking lots and parking garage are located west and north of the Property.

Historical uses of adjacent properties include cleaners and dyeing, electroplating, wallpaper and paints to the north; paints and laundry to the east; automobile repair and paint shop, scrap metal, and machine shop to the south; and a photo shop, auto body shop, and auto service station to the west. Multiple underground storage tanks (heating oil and gasoline storage) were located adjacent to and in the vicinity of the Property.

Regulatory database findings indicate there are multiple historical dry cleaners on the Property, and one historical auto station on the Property. Adjacent regulatory database findings include historical dry cleaners, historical auto stations, leaking underground storage tanks and a Brownfields site.

The former auto service station, dry cleaning and light industrial operations on the Property and the adjacent historical commercial and light industrial practices adjacent to the Property are Recognized Environmental Conditions (RECs).

2. CONCLUSIONS AND RECOMMENDATIONS

The Phase I ESA has revealed evidence of RECs as defined by ASTM E 1527-13 for the Subject Property. Identified RECs include:

REC #1: Historical land uses on the Subject Property, including former automobile service station, dry cleaners, cattle and insect powder manufacturing, paints and wallpaper, tinning, and manufacturing operations, may have impacted near surface soils with solvents, pesticides, petroleum hydrocarbons and metals. Heating oil underground storage tanks and underground storage tanks associated with the historical automobile service station may also be present on the Property.

REC #2: Historical land uses on adjoining properties have the potential to impact soil vapor at the Subject Property. Adjacent operations of concern include cleaners and dyeing, electroplating, wallpaper and paints to the north; paints and laundry to the east; automobile repair and paint shop, scrap metal, and machine shop to the south; and a photo shop, auto body shop, and auto service station to the west, and businesses with underground storage tanks.

Recommendation: Complete a geophysical survey to identify any tanks or suspected underground storage tank locations and the extent of fill, if present (e.g., filled-in basement or fill placed across the Property). A general characterization of the Subject Property should also be conducted to identify risks associated with potential contamination of soil and soil vapor from underground storage tanks and historical practices. If underground storage tanks are on the Property, they are required to be decommissioned per DEQ standards. If drywells are located, they will also require characterization, decommissioning and/or registration. Pending the findings of the geophysical survey and the site investigation activities, a soil vapor survey may be required.

3. INTRODUCTION

Coles + Betts Environmental Consulting, LLC (C+BEC) was retained by Prosper Portland (PP, the Client), to perform a Phase I Environmental Site Assessment (ESA) of the Williams and Russell Development, a city block located northwest of the intersection of N Williams Avenue and N Russell Street, Portland, Multnomah County, Oregon (the Subject Property or the Property herein). The protocol used for this assessment is in general conformance with ASTM E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*.

On June 26, 2020, Ms. Jill Betts, R.G. of C+BEC, an environmental professional, conducted a site reconnaissance to assess the possible presence of RECs as per ASTM E 1527-13 in connection with the Subject Property. The Phase I ESA investigation also included review of aerial photographs and other historical information; a visual survey of adjacent properties from the Property perimeter and surrounding streets; where possible, physical setting source research; and review of readily available local, state, and federal regulatory records regarding the subject and surrounding properties. Qualifications of personnel responsible for the preparation of this report may be found in Section 11 of this report.

3.1 Purpose

The purpose of this Phase I ESA was to identify evidence of existing or potential RECs (as defined by ASTM Standard E 1527-13) in connection with the Subject Property. C+BEC understands that the purpose the Phase I ESA is to support property acquisition by PP.

Additional environmental issues outside the scope of ASTM Standard E 1527-13 were not evaluated in connection with this Phase I ESA. This Phase I ESA was not intended to identify the presence of or reduce the risk from the presence of mold and/or physical conditions conducive to mold that may pose a risk to buildings and building occupants, radon gas, lead-based paint, lead in drinking water, fluorescent light ballast, wetlands, flood zones, and/or asbestos-containing materials (ACMs). As a service to the Client, C+BEC has completed a visual assessment for suspect ACMs.

As specified in ASTM Standard E 1527-13, C+BEC reviews information from outside sources in the course of a Phase I ESA investigation. The information obtained from these sources is considered by C+BEC to be reliable. C+BEC is not required by the ASTM protocol to independently verify information provided by such sources. Consequently, C+BEC cannot and does not warrant or guarantee the accuracy of information provided by other sources.

Phase I ESAs are not intended to be technically exhaustive and the ASTM prescribed protocol leaves open the possibility that conditions may exist on a Subject Property that could not be identified with the proper application of the methodologies utilized herein.

3.2 Scope of Services

The scope of services for this Phase I ESA was conducted in general conformance with ASTM Standard E 1527-13. C+BEC warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying RECs.

No other warranties are implied or expressed.

3.3 Special Terms and Conditions

The work performed is governed by a Contract and Work Order between C+BEC and the Client.

The conclusions and findings set forth in this report are limited in time and scope to the date of the report. The conclusions presented in the report are based solely on the services and methodologies described therein. No tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the client were performed in connection with the preparation of this report. No subsurface exploratory drilling, discovery, or sampling was conducted under this scope of work.

3.4 User Reliance

This report has been prepared solely for the use of the Client in connection to the Subject Property and in accordance to the limitations and conditions of the executed Services Agreement with the Client, and may not be relied upon any third party or entity without the written consent of C+BEC. Use by any third party shall be at the user's risk.

3.5 Limitations and Exceptions

The purpose of this Phase I ESA is to evaluate the Subject Property for RECs as defined by ASTM Standard E 1527-13. In this regard, the assessment was prepared and implemented using the degree of care and skill ordinarily exercised by, and consistent with, the standards competent environmental science professionals would apply in evaluation of a similar site in vicinity of the Subject Property. In performing such a study, it is understood that a balance must be struck between reasonable inquiry into the Property conditions and cost of an exhaustive evaluation.

No environmental site assessment can wholly eliminate uncertainty regarding potential environmental conditions in connection with a property since the reasonably ascertainable information on which the conclusions and recommendations are based may not adequately describe the current or historical uses and conditions of the property. In addition, the information utilized by C+BEC to facilitate this assessment has been obtained, reviewed, and evaluated from various sources believed to be reliable, including property owners, operators, state and federal agencies, or other knowledgeable persons. Although C+BEC's conclusions, opinions, and recommendations are based in part on such information, C+BEC's services did not include the verification of its accuracy or authenticity. Should such information prove to be inaccurate or unreliable, C+BEC reserves the right to amend or revise its conclusions, opinions, and/or recommendations. Furthermore, no exploratory investigation or chemical analyses was performed during the course of this assessment.

Without limitation, C+BEC does not provide guarantee or certification that the subject site is free of contamination and is not responsible for any changes in environmental standards, practices, or regulations subsequent to performance of these services. In addition, this assessment excludes hazardous substances incorporated into buildings, improvements, or facilities on the property unless otherwise specified. This assessment does not include evaluation for potential off-site vapor intrusion sources. The document herein is a work of opinion and therefore we do not offer any warranty regarding advice, conclusions, or recommendations. In addition, advice, opinions, and recommendations should not be used as a substitute to that of legal counsel.

3.6 Data Gaps

For the purpose of this report data gaps are considered to be the lack of or the inability to obtain information as required by ASTM Standard E 1527-13. Data gaps directly relating to this investigation are detailed below. A discussion of the impact (if any) of these limitations, exceptions, and data gaps to the findings and conclusions of this report are also presented. Any data gaps considered by the supervising environmental professional to be significant are further discussed in this report.

- Previous Property owners could not be located to interview regarding their historical operations on the Property. Based on our knowledge of the history of the area, this data gap is not considered likely to impact the findings of this report.
- Aerial photographs were not available for five-year increments as required by ASTM E 1527-13. However, available aerial photos coupled with other site documentation suggest property uses did not materially change between gaps in the photographic record, and as such, are not considered to likely impact the findings of this report.
- Historical building plans and permits from the City's Bureau of Development Services' Records Department were not available as of the date of this report. Based on the available historical site documentation and available permits on-line at PortlandMaps.com, this data gap is not considered likely to impact the findings of this report.
- Portions of the exterior ground surface were unable to be viewed because they were covered by dense vegetation or houseless encampment activities. Based on the historical permits and other site observations during the site reconnaissance, the obstructed view of portions of the exterior ground surface are not considered to likely impact the findings of this report.
- A complete Title Report was not available as required by ASTM E 1527-13. Based on the knowledge of the history of the area, this data gap is not considered likely to impact the findings of this report.

3.7 Significant Assumptions

C+BEC made the following assumptions in the preparation of this report:

- Groundwater flow direction was inferred from available documentation such as well log, topographic information, regulatory file notation, and our professional experience. The actual groundwater flow direction was not verified and may be influenced by a number of factors outside the scope of this investigation.
- Information obtained from regulatory and/or enforcement-agencies during the course of this investigation are assumed to be complete, accurate, and current.
- Information obtained regarding land use limitations and environmental liens, where provided, are assumed to be complete, accurate, and current.
- C+BEC assumes all information obtained through interviews to be complete, unbiased, and accurate to the best ability of the interviewed parties.

4. CLIENT AND PROPERTY OWNER PROVIDED INFORMATION

4.1 Title Records

A Title Report was not available for the Property. Additional information regarding the Property is discussed in the appropriate sections of this report. Please see *Section 3.6, Data Gaps*.

4.2 Environmental Liens or Activity and Use Limitation

A review of the Subject Property environmental database records, and interviews with the County Tax Assessment Office and the property owner indicate there are no liens on the property. There is no DEQ activity and use limitations for the Property.

Mr. MinNefer Mernahkem, a representative of the Client, completed a Phase I ESA Pre-Survey Questionnaire and Disclosure Statement (Appendix A). He indicated he was not aware of any liens or Activity and Use Limitations associated with the Property. Mr. Ali Sadri, a representative of the Property owner, was not aware of any liens or Activity and Use Limitations associated with the Property.

4.3 Previous Reports/Documents

The Property owner, Legacy Health System, did not have any previous reports or documents regarding the Property's history or environmental conditions.

4.4 Reason for Performing Phase I ESA

C+BEC was contracted by the Client to conduct this Phase I ESA prior to the redevelopment of the Property.

4.5 Other

Any specialized knowledge, commonly known or reasonably ascertainable information regarding the Subject Property and vicinity conveyed to C+BEC by the Client (if any) is included in the applicable section(s) of this report.

5. SITE DESCRIPTION

5.1 Location and Legal Description

The approximately 2.24-acre Subject Property is a city block owned by Legacy Health System located northwest of the intersection of N Williams Avenue and N Russell Street in Portland, Multnomah County, Oregon (Figure 1). The property consists of the entire city block and the southern half of Knott Street (Tax Lot 1N1E27AC 4100 and the adjacent southern half of N Knott Street, and the portion of Tax Lot 1N1E27AC 1800 south of the midline of N Knott Street) (Figure 2). The property is bounded on the north by N Knott Street, on the east by N Williams Avenue, on the south by N Russell Street, and on the west by N Vancouver Avenue.

The Property is a grass-covered vacant lot. The Property is zoned as Commercial Mixed Use 2 (CM3dm(MU-U)) Land.

5.2 Site and Vicinity General Characteristics

The Subject Property is located in Portland within a mixed commercial- and residential-use area (Figure 2). N Williams Avenue bounds the Property to the east beyond which are multiple residential properties. A mid-rise residential building is located southeast of the Property beyond the intersection of N Russell Street and N Williams Avenue, and residences are also located northeast of the Property beyond the intersection of N Knott Street and N Williams Avenue. Commercial properties bound the Property to the south beyond N Russell Street, with one multi-story building that is both commercial and residential use. Two commercial buildings and their associated parking lots are located southwest of the Property beyond the intersection of N Vancouver Avenue and N Russell Street. A surface level parking lot and multi-story parking lot building are west and northwest of the Property beyond N Vancouver Avenue and the intersection of N Knott Street and N Vancouver Avenue, respectively. A surface level parking lot, grass-covered vacant lot, and the northern half of N Knott Street are located north of the Property.

5.3 Detailed Property Description

Ms. Jill Betts, R.G. of C+BEC conducted a site survey of the Subject Property on June 26, 2020. The Property was inspected for visual evidence of contamination, for improper waste disposal, for the potential presence of PCBs, and for potential USTs. Legacy Health System granted access to the Property. The ground reconnaissance consisted of observation of the periphery and interior portions of the Property and visual reconnaissance of adjoining sites from public access areas.

5.3.1 General Property Setting

The Property is a grass-covered vacant lot with two asphalt-paved driveway entrances located on the northern portion of the Property. There are no buildings on the Property. A sign is located on the southeast corner of the Property. The Property is generally level.

Based on one-call utility locate markings observed during the site reconnaissance, the catch basin at the northwest corner of the Property discharges to the municipal stormwater system that runs east-west below N Knott Street along the northern Property boundary. The catch basin ultimately discharges to the municipal system below N Vancouver Ave. An electrical power line conduit is also located below N Knott Street along the northern Property boundary, and electrical utility vaults and boxes are located north of the Property in the grass covered lot. Visible evidence of water and sanitary sewer lines were not observed.

The Property conditions, structures, and other items of interest are indicated on Figure 2 and in Site Photographs appended to this Report (Appendix B).

5.4 Current Property Use

The Property is owned by Legacy Health System. The lot is vacant and is used for community gatherings on an annual basis.

5.4.1 Summary of Observations on the Property

Visual observations made during the site reconnaissance are summarized in the table below, along with a determination whether any observations are considered a REC for the Property. Locations of items discussed below are indicated on Figure 2. Photographs of the Subject Property are included in Appendix B.

Condition	Observed?	Explanation	REC?
Hazardous Substances/ Petroleum Products/ Drums/ Suspicious Containers	No	*De minimis* staining was observed at some paved driveway locations. There was no evidence of a significant release. Suspicious containers were not observed.	No No

Condition	Observed?	Explanation	REC?
Other Possible Indicators of Hazardous Substance Impacts	No	Groundwater monitoring wells, stained soils, and odors were not observed.	No
Underground Storage Tanks (USTs)	No	Fill ports and vent pipes were not observed during the site reconnaissance.	No
Above-ground Storage Tanks	No	Above-ground storage tanks (ASTs) were not observed.	No
Septic Tank	No	Evidence of a septic tank was not observed. It is unknown whether former structures on the Property were connected to the sanitary sewer.	No
PCB-containing Electrical Equipment	Yes	Pole-mounted transformers were observed adjacent to the Property. Evidence of a release was not observed.	No
Sumps/Drains/ Drywells	No	One catch basin was observed on the northwest corner of the Property. There was no evidence of a release at or in the catch basin. The catch basin discharges to the municipal storm sewer utility line below N Knott and ultimately into the municipal storm sewer line below N Vancouver Avenue.	No
Wells	No	Potable water wells or groundwater monitoring wells were not observed on the Subject Property.	No
Standing Water/Pits/Ponds/ Lagoons	No	Standing water, pits, ponds or lagoons were not observed.	No
Undocumented Fill	No	Fill material was not observed.	No
Staining/Odors	No	Oil stains were observed in the asphalt-covered driveways. They were *de minimis* and not of environmental concern to the Property.	No
Stressed Vegetation	Yes	Stressed vegetation was observed. The location coincides with historical Property uses that may be of environmental concern.	**YES**
Asbestos Containing Materials (ACMs)	No	Suspect ACMs were not observed. For additional details regarding ACMs on the Property please see *Section 5.4.2.*	No
Hydraulic Equipment	No	Hydraulic equipment was not observed.	No

5.4.2 Asbestos Containing Materials

Asbestos containing materials (ACMs) are considered beyond the scope of a Phase I ESA conducted in accordance with ASTM E 1527-13, but as a service, we have been included this as a non-scope consideration. Asbestos is a U.S. Environmental Protection Agency (EPA)-regulated substance that has historically been used in building materials, examples of which include, but are not limited to, insulation, ceiling tiles, floor tiles, roofing materials, and various mastics. There are no buildings on the Property. Suspect ACMs were not identified during the site reconnaissance.

5.5 Current Use of Adjoining Properties

The use of the parcels adjacent to the Subject Property are listed below. Please refer to Figure 2.

- North: The northern half of N Knott Street, beyond which were an asphalt-covered parking lot with landscaping, a vacant grass-covered lot with electrical utility boxes, and subgrade utility vaults on the vacant lot's southwest corner.
- Northeast: Intersection of N Williams Avenue and N Knott Street, beyond which is a single-story Legacy Emanuel residential housing unit.
- East: N Williams Avenue, beyond which is the single-story Meyers Court apartments and associated parking lot.
- Southeast: Intersection of N Williams Avenue and N Russell Street, beyond which is a multi-story residential building (Unthank Plaza).
- South: N Russell Street, beyond which are the multi-story Urban League of Portland building (10 N Russell Street), Philbin Rebuilt Products, Inc. a battery charger repair service, electric tool repair, and gas analyzers, connectors, and scopes sales and repair (28 Russell Street), and Sloan's Bar and Restaurant (36 N Russell Street).
- Southwest: Intersection of N Vancouver Avenue and N Russell Street, beyond which are a single-story Columbia Gorge Model Railroad Club building and parking lot with landscaping (2505 N Vancouver Avenue Street) and a single-story OHSU dental clinic and its associated parking lot (214 N Russell Street).
- West: N Vancouver Avenue, beyond which is an asphalt covered parking lot and landscaping that is part of the Legacy Emanuel Hospital campus.
- Northwest: Intersection of N Knott Street and N Vancouver Avenue, beyond which is a multi-story parking garage that is part of the Legacy Emanuel Hospital campus.

Based on the visual survey of the adjoining parcels from the Subject Property perimeter and surrounding streets, conditions that could represent a REC for the Property (*i.e.,* leaking waste containers, poorly managed industrial sites) were not observed.

5.6 Physical Setting Sources

5.6.1 Topography

According to the USGS topographic map (1995), the Subject Property is located at approximately 155 feet above mean sea level (MSL) and is relatively flat. The nearest water body, the Willamette River, is located approximately 0.55-mile southwest of the Property.

5.6.2 Geology

According to the *Geologic Map of the Portland Quadrangle, Multnomah and Washington Counties, Oregon and Clark County, Washington* (1991) (Beeson and others), the soils in the vicinity of the Property were underlain by Quaternary Fine-grained facies of coarse sand to silt deposited by catastrophic floods.

Boring logs from nearby site investigation activities (i.e., within two blocks of the Property) indicate silts, clay and sands are within the upper 33 feet with sandstone and sand and gravel between 33 and 75 feet, with sandstone and clay between 75 and 155 feet below ground surface (bgs), and sand, boulders, and gravel between 155 and 260 feet bgs. Basalt was encountered between 260 and 400 feet bgs.

5.6.3 Hydrogeology

Based on the topography of the Subject Property and vicinity, the Subject Property's proximity to surface waters, and information obtained from well log data from Environmental Data Resources (EDR), and the Oregon Water Resources Department (OWRD), local groundwater is inferred to flow to the southwest towards the Willamette River.

OWRD, EDR, and DEQ records indicate there are no potable or groundwater monitoring wells on the Property.

According to the OWRD well logs for groundwater monitoring wells and geotechnical borings installed on and in the vicinity of the property, static groundwater was encountered to depths between 6 feet and 163 feet bgs and first water was encountered between 5 feet and 206 feet bgs. Portlandmaps.com indicates groundwater is between 80 feet and 120 feet bgs below the Property. Boring logs from nearby drilling activities did not encounter groundwater within the upper 35 feet.

5.7 Historical Use of the Subject Property and Adjacent Properties

C+BEC reviewed the following *practically reviewable* historical information sources to determine the history of the Property and surrounding parcels for this report:

Media	Source	Years (if applicable)
Tax Assessment Records	Multnomah County Assessment and Taxation Department	Property is in the Railroad Shops Addition; initial development date not listed.
Survey Maps & Records	Online resources including Multnomah County Library, Oregon Historical Society, and Vintage Portland	1962 historical photograph showing Billy's Cleaners on 5 N Russell St.

Building Permits and Plans	Portland Building Development Services Records (PortlandMaps.com)	No building permits or plans were available for the subject property. Twenty-three nearby UST permits were available, including 2 for the subject property. One for 7 N Russell dated November 22, 1949 for the installation of an oil burner but no UST. Another for 15 N Russell also dated November 22, 1949 for the installation of an oil burner with an integrated 5-gal fuel tank.
Aerial Photos	EDR	1936, 1948, 1951, 1955, 1960, 1963, 1970, 1975, 1981, 1994, 2000, 2005, 2009, 2012, 2016.
Reverse City Directories	EDR	1924, 1930, 1935, 1940, 1946, 1950, 1955, 1960, 1965, 1970, 1975, 1981, 1985, 1992, 1994, 1999, 2004, 2005, 2009, 2014, 2017
Topographic Maps	USGS (from EDR)	1897, 1905, 1940, 1954, 1961, 1970, 1977, 1995, and 2014.
Sanborn Fire Insurance Maps	EDR and Multnomah County Library Online Databases	1889, 1901, 1909, 1924, 1950, and 1969.
Commercial UST Permits	Portland Fire Bureau (PortlandMaps.com)	Twenty-three nearby UST permits were identified, including 2 for the subject property. One for 7 N Russell dated November 22, 1949 for the installation of an oil burner but no UST. Another for 15 N Russell also dated November 22, 1949 for the installation of an oil burner with an integrated 5-gal fuel tank.
Newspaper Articles Regarding Environmental Incidents at the Property	http://infoweb.newsbank.com Archives of The Oregonian were searched.	Such articles were not found.
Previous Environmental Reports	No previous reports or documents were provided for the Property	

Historical aerial photographs of the Subject Property are Included in Appendix C. Reverse city directories, topographic maps, and Sanborn Fire Insurance Maps provided by EDR are included in Appendix D. Commercial UST permits are included in Appendix E.

5.7.1 Historical Use of the Subject Property

Below is a timeline summary of historical uses of the Property based on document(s) reviewed.

Document(s) Reviewed	Notes
1889 Sanborn Map & 1897 Topographic Map	Two structures are shown along Russell Street in the Sanborn Map. One is a residential dwelling and another is a storefront with a residential dwelling. An awning for the storefront extends south into the Russell Street right-of-way. No address numbers are shown for the structures. The Topographic map does not show any structures, but shows development of the Albina neighborhood with several structures on adjoining properties.
1901 Sanborn Map & 1905 Topographic Map	Approximately ¼ of the block is shown in the Sanborn Map as developed: one dwelling in the north central portion of the block, 3rd Baptist Church in the northwest corner of the block (258 N Knott Street), a cattle and insect powder manufacturing and storage building (255 & 257 N Russell Street) in the southwest corner of the block, the Hill Block Building in the southeast corner along with several storefronts along Russell Street, including one listing Paints & Wall Paper (269 ½ N Russell Street). The church and Hill Block Building marked as having hot air heaters. The central and northeast portions of the block are undeveloped. The topographic map shows similar development on the block, except structures on the western portion of the block (i.e., the Church and manufacturing/storage building) appear oriented along Vancouver Avenue vs. Knott and Russell Streets, respectively.
1909 Sanborn Map	The dwelling, 3rd Baptist Church, and Hill Block Building (with adjacent storefronts along Russell St) are still present, and large structures are now present north of the Hill Block Building to Knott Street along Williams Avenue. Both of the new structures are listed as having steam heat. One of the previous storefronts along Russell Street (center block) expanded into a larger structure with two storefronts, while another is listed as a Tinning shop (265 N Russell Street). The Paints & Wall Paper shop is no longer listed. The insect powder manufacturer building in the southwest corner of the block is no longer present, and two vacant structures are now present along Vancouver Avenue.

Document(s) Reviewed	Notes
1924 Sanborn Map	The 3rd Baptist Church expanded to the east and is marked as having furnace heat. The address numbers for the Church are listed as 254 & 256. New structures are now present around the dwelling in the north central portion of the block: a residential flat to the west, auto garages to the south, and two storefronts listed as Mixing and Concrete Works to the east. The northeastern-most storefront is listed as a bank, and the northern portion of the Hill Block Building is listed as a Painting shop (on 2nd floor, 235 & 237 N Williams Avenue). The Tinning storefront along Russell Street is no longer listed, but Paint & Wall Paper, Paint Storage, and Carpenter with an auto garage are listed on expanded structures in the south-central portion of the block (263 & 265 N Russell Street). The former vacant structures in the southwest corner of the block are no longer present and have been replaced with a creamery, storage rooms, and auto garages.
1935, 1940 and 1946 City Directories, 1936 Aerial Photograph & 1940 Topographic Map	The resolution of the aerial photo is poor but shows the block almost entirely developed with the exception of the west central portion of the block along Vancouver Avenue. The southwest corner of the block had been removed for the reconfiguring of Vancouver Avenue. A building with an awning (Red Arrow Service Inc gas/Stull Albert M gas station at 2608 N Vancouver Avenue) is present on the southwest corner of the block along Vancouver Avenue. The city directories list Demme Bros Paint Wholesale/ACME Glass & Glazing at 35 N Russell Street. The block is shaded in the topographic map indicating dense development.
1950 Sanborn Map, 1950 City Directory & 1948 and 1951 Aerial Photographs	*(Note: street addresses were renumbered in 1933.)* The Sanborn Map shows the Church in the northwest corner of the block listed as Hughes Memorial M. Church. The Mixing shop along Knott Street is shown as a generic storefront and the adjacent Concrete Works shop is shown as Cold Storage. The bank at the corner of Knott Street and Williams Avenue is no longer present. One of the storefronts midblock on Williams Avenue is listed as Cleaner Manufacturing on the 2nd floor (2639 N Williams Avenue). The Paints & Wall Paper facility operations expanded to the north and now list Paint Storage and Paint Warehouse 35 & 37 Russell Street). Structures along Vancouver Avenue have been removed to accommodate the Vancouver Avenue reconfiguration, and only the building formerly listed as a creamery is present along Russell Street. A small structure is now present adjacent west of the former creamery and is listed as Gas & Oil (Red Arrow Service, 2608 N Vancouver Avenue). Associated Cleaners is listed in the city directory at 2653 N Williams Avenue. Land use observed in the aerial photos appear similar to the 1940 photo.

Document(s) Reviewed	Notes
1954 Topographic Map, 1955 City Directory & 1955 Aerial Photograph	Associated Cleaners is listed at 2653 N Williams Avenue. The topographic map shows dense development of the block and lists the Church in the northwest corner of the block. Land use observed in the aerial photo appears similar to the 1948 and 1951 photos.
1960 and 1963 Aerial Photographs, 1960 City Directory, 1961 Topographic Map & 1962 Historical Site Photograph	Land use appears unchanged in the aerials and topographic map. The historical photo shows the Hill Block Building looking north/northwest from Williams Avenue. The second storefront in the historical photo on Russell Street is Billy's Cleaners (5 N Russell Street), which is also listed in the city directory as Billy's Dry Cleaning.
1965 and 1970 City Directories, 1969 Sanborn Map, 1970 Aerial Photograph & 1970 Topographic Map	The land use appears unchanged in the Sanborn Map and aerial photo, except the Church in the northwest corner of the block and the gas station in the southwest corner of the block have been removed. Structures in the northeast corner of the block at 18 to 22 N Knott Street and 2643 to 2657 N Williams Avenue are listed in the Sanborn Map as "fire ruins" and "vacant & damaged by fire", respectively. Demme Bros Paint Wholesale is listed in the city directory at 7 N Russell Street. The topographic map shows the block is developed, including showing the Church.
1975 Aerial Photograph & 1977 Topographic Map	The topographic map shows development and the presence of a church and a small road off Vancouver Avenue; however, the aerial, though the resolution is poor, shows developments on the block had been almost completely removed. The residential structures in the north central portion of the block appear to remain.
1981 Aerial Photograph	Except for a few existing trees in the north central portion of the block and a row of new trees along Russell Street and Vancouver Avenue, land use on the block appears unchanged.
1994 Aerial Photograph & 1995 Topographic Map	Except for the topographic map no longer showing a church, land use appears unchanged.
2000 and 2005 Aerial Photographs	By 2000, the western portion of the block is a gravel lot used as trailer and equipment storage. The eastern portion shows storage/dumping of dirt and debris, with some trash present. By 2005, the block is again cleared and vacant. Vegetation persistently appears sparse/distressed in notable areas on the block: the northwest corner of the block (former Church area), the southwest corner of the block (former cattle & insect powder manufacturer and gas & oil station area), and the south-central portion of the block (former paints & wall paper & tinning area).

Document(s) Reviewed	Notes
2009 and 2012 Aerial Photographs	The block was again covered with gravel in 2009 and used partly as construction staging and off-street parking (additional discussion regarding construction station is provided in Section 7 - Interviews). Two concrete aprons were installed along Knott Street and used as an entrance and exit to the lot. Vehicles, job trailers, equipment, utility pipe, and aggregate piles have been stored on the block. In 2012, the block was largely used as off-street parking.
2014 Topographic Map & 2016 Aerial Photograph	The asphalt aprons remain, but the block has been cleared and revegetated. Vegetation still appears sparse in previously noted areas.

Based on our review, historical land use on the Williams & Russell Block has predominantly been a mix of residential and commercial but has also included some light industrial operations. Historical land uses have included operations that utilize hazardous materials or produce hazardous materials waste. These operations include (with contaminants of concern in parentheses):

- Cattle and Insect Powder Manufacturing (pesticides, metals)
- Paints & Wallpaper; two locations (solvents, metals)
- Cleaners; two locations (solvents)
- Tinning (metals, acids)
- Gas & Oil (petroleum hydrocarbons, metals)
- Manufacturing; non-specific (solvents, metals)

The former church was listed as having furnace heat, which may have used an above-ground storage tank (AST) or UST. Similarly, ASTs or USTs may have been used for the Gas & Oil station. Heating oil tanks may also be associated with other buildings. It is unknown if UST are present on the Property.

Off-street parking, equipment storage, and storage/dumping of dirt & debris on the block have the potential to adversely impact surface soils and vegetation in several areas is persistently sparse and may possibly be distressed from contamination.

The identified historical hazardous materials operations on the block, the potential for USTs to be present on the block, and the potential for surfaced soils to have been adversely impacted are considered RECs for the Property.

5.7.2 Historical Use of Adjoining Properties

By review of the standard historical sources referenced above, the historical uses of the adjoining properties are summarized below.

North: Residential development is observed on blocks north of the Property by at least 1897. In-fill residential development is visible with increasing

commercial development largely along Williams Avenue. Commercial operations with potential environmental concern included cleaning & dyeing, wallpaper & paints, a fuel shed, sheet metal works and electroplating. By 1936, two small buildings are present on the block northwest of the Property along Vancouver Avenue and appear to be gas stations. By 1963, the majority of structures on this block had been removed and the lot was being used for surface parking. By 1969, structures in the central portion of the block to the north of the Property had been removed but commercial buildings along Vancouver Avenue and Williams Avenue remained. The remaining structures on the block to the northwest were removed by 1975 and remaining structures on the block to the north were removed by 1981 and the western portion of the lot was used for surface parking. By 1994, commercial structures along Williams Avenue on the block to the northwest had been replaced with residential developments. The block to the northeast was redeveloped with a parking garage sometime prior to 2005. Land use appears unchanged through present day.

East: Residential development is observed on blocks east of the Property by at least 1889. Increasing commercial development is visible in the early 1900s on blocks to the east and southeast along Williams Avenue and Russell Street. In-fill residential development is observed on remaining portions of the block to the southeast. Commercial operations with potential environmental concern included paint and wallpaper shops, painting and a laundry. An electric substation is present in the central portion of the block to the east of the Property by at least 1936 and operations appeared to have expanded to the east by 1960. By 1975, most structures on the blocks to the east and southeast of the Property had been removed, with the substation and a few commercial structures remaining. By 1981, all of the structures these blocks, except for the substation, had been removed and the western portions of both blocks had been redeveloped with commercial structures. The substation operations appear to have expanded further, occupying the eastern two-thirds of the block. Residential developments are present on the perimeter of the block to the southeast of the Property in 1994. Land use appears unchanged through present day.

South: Development is observed on the blocks to the south and southwest of the Property by at least 1889. The Albina Public School is on the block to the south of the Property and a Scandinavian Methodist Church is on the block to the southwest; residential development is observed on the blocks beyond. By 1901 the school has expanded and listed as the Williams Ave Public School and the Scandinavian Church had been replaced with a row of storefronts along Russell Street. By 1924, the school had been removed from the block to the south and the northeastern corner of the block had been redeveloped with group of commercial storefronts, one listed as a clothes cleaners. By 1936, the reconfiguration of Vancouver Avenue caused the removal of structures on the northeast corner of the block to the southwest of the Property. Commercial development on the block to the south expanded to the

west, and included auto painting, auto repair, and a machine shop. By 1960, structures on the northern portion of the block to the southwest of the Property appear to have been removed and replaced with a small commercial building listed as a restaurant. In 1969, undeveloped land on the block to the south of the Property is listed as a scrap metal yard. A commercial building was constructed on the block southeast of the Property by 1970, and the restaurant is no longer present by 1975. A building was constructed on the block to the south in the scrap metal yard by 1981, which later expanded sometime by 1994. Land use appears unchanged through present day.

West: Development is observed on the block to the west of the Property by at least 1889. Commercial development is visible along Vancouver Avenue in the early 1900s. Commercial operations with potential environmental concern include a photo shop, sign painting, pipe bending and welding, and an auto garage with an office listed with stove heat. By 1950, the auto garage listed gas and oils in the southeast corner of the building and by 1969, the building was listed as an auto body shop without gas and oils. By 1975, structures on the block appear to have been removed. The block appears to be used for material and vehicle/equipment storage through 2000. By 2005, most of the lot was developed into paved parking with a small building. Except for a small community garden in the southwestern portion of the block developed sometime before 2012, land use appears unchanged through present day.

Historical records indicate the historical practices at adjacent parcels may be of environmental concern to the Property if hazardous substances were released, and vapors migrate onto the Property, this would constitute a REC for the Property.

6. RECORDS REVIEW

6.1 State and Federal Regulatory Record Review

C+BEC reviewed contracted with Environmental Data Resources, Inc. (EDR) to conduct a search of regulatory databases within the search radii specified in the ASTM standard. The results of EDR's search, including a map showing the spatial distribution of identified sites with respect to the Subject Property are included in Appendix F. The environmental records for the Property and nearby sites are presented in the appropriate sections below. Due to inherent inaccuracies in the zip code information for these lists, it is possible that one or more sites within the 1.0-mile radius of the Property were missed during the records search.

Regulatory review resources pertinent to the Property, and those required by ASTM Standards, are summarized as follows, and noted further below where appropriate.

Databases Searched by EDR	Property Listed in Database?	Site(s) Located Within Search Distance?
One Mile Search Distance		
Federal NPL Site List		
Federal CORRACTS		
Federal De-listed NPL Site List		
Oregon ECSI List		X

RCRA – Resource Conservation and Recovery Act
RCRIS – Resource Conservation and Recovery Information System
SWF – solid waste facility
TSD – transfer and storage disposal
UST – underground storage tank

6.1.1 Subject Property

The Subject Property is not listed in EDR's government environmental regulatory database search; however, it is listed in EDR's proprietary historical auto stations and dry cleaners records as listed below. Their locations on the Property (Site A) are indicated in Figures 2 and 3.

Historical Auto Stations:

Red Arrow Service, Inc., 2608 N Vancouver Avenue (Southwest corner of the Property).

The auto station was in service between at least 1935 and 1940.

Historical Dry Cleaners:

Billy's Dry Cleaning, 5 N Russell Street (Southeast corner of the Property).

The dry cleaners establishment was in service in at least 1960.

Perkins Cleaners, 11 N Russell Street (Southeast corner of the Property).

The dry cleaners establishment was in service in at least 1950.

Associated Cleaners, 2653 N Williams Avenue (Northeast corner of the Property).

The dry cleaners establishment was in service between at least 1950 and 1955.

Please see Section 5.7 for additional details regarding the historical business practices on the Property.

EDR incorrectly identified one site (PacifiCorp DBA Pacific Power & Light Co at 44 N Knott Street) as located on the Property. Instead, the site is an electric substation located a half block east at 44 NE Knott Street, approximately 200 feet east of the Property. The site is listed in the FINDS, ECHO, HSIS, Manifest and Spills databases as a certified exempt small quantity hazardous waste generator and no violations were listed for this site. The lack of violations indicate this site's hazardous waste storage and generation is not likely to be of environmental concern to the Property. In 1997, an electrical equipment fire resulted in a 960-gallon spill of an unreported material at the substation. Due to the depth

to groundwater (at least 80 feet bgs) and the distance from the Property, the spill is not likely to be of environmental concern to the Property. Based on the above, the PacifiCorp electric substation at 44 NE Knott is not of environmental concern to the Property (See *Section 6.1.2.)*.

6.1.2 Adjoining and Surrounding Properties

EDR identified three adjacent properties that were listed in EDR's government environmental regulatory database search. These properties are described below and their locations are indicated in Figure 2.

To the North:

Gilt Edge Dyeing and Cleaning Works, Historical Dry Cleaners, 19 N Knott Street (Site B, Adjacent north of the Property beyond N Knott Street).

The dry cleaners establishment was in service between at least 1935 and 1940.

To the Northeast:

LAC A-Wonicia Cleaning and Pressing, Historical Dry Cleaners, 2716 N Williams Avenue (Site C, Adjacent northeast of the Property beyond the intersection of N Knott Street and N Williams Avenue).

The dry cleaners establishment was in service between at least 1960 and 1981.

Heating Oil Tank, LUST No. 26-91-0375, NE Corner of N Williams Street and N Knott Street (Site D, Adjacent northeast of the Property beyond the intersection of N Knott Street and N Williams Avenue).

One 300-gallon heating oil UST was decommissioned by removal in September 1991, and approximately 36 cubic yards of petroleum contaminated soil was removed and transported to Hillsboro Landfill for disposal. Groundwater was not encountered during soil removal activities. Confirmatory soil sampling indicates the highest concentration detected was 199 parts per million (ppm), which was below the Level 2 Soil Matrix Cleanup Level of 500 ppm for diesel/oil. This detected concentration of heating oil in soil (199 ppm) is also below the current, most conservative DEQ Risk-Based Concentration of 1,100 ppm for diesel/oil. DEQ issued a No Further Action letter for a Soil Matrix Cleanup in October 1992. Based on the above, this site is not likely to be of environmental concern to the Property.

To the East:

Swimmer Louis, Historical Dry Cleaners, 2628 N Williams Avenue (Site E, Adjacent east of the Property beyond N Williams Avenue).

The dry cleaners establishment was in service in at least 1935.

To the Southeast:

Self Service Laundry, Historical Dry Cleaners, 2518 N Williams Avenue (Site F, Adjacent southeast of the Property beyond the intersection of N Russell Street and N Williams Avenue).

The dry cleaners establishment was in service between at least 1950 and 1955.

U Neek Cleaners, Historical Dry Cleaners, 2 and 4 NE Russell Street (Site G, Adjacent southeast of the Property beyond the intersection of N Russell Street and N Williams Avenue).

The dry cleaners establishment was in service between at least 1950 and 1960.

To the South:

PCRI, US Brownfields, 10 N Russell Street, (Site H, Adjacent and south of the Property beyond N Russell Street).

A site assessment was conducted in January 2013 to determine whether a 1,750-gallon heating oil tank was present in the right-of-way east adjacent to the site, and whether further assessment was required. The site assessment determined a 2,500-gallon underground heating oil tank was present, and soil tests did not indicate the tank had released petroleum to the subsurface. The tank was subsequently decommissioned however there are no UST decommissioning records available. Based on the lack of a release from the tank, it is unlikely this leaking heating oil tank represents an environmental concern for vapor and/or contaminant migration onto the Property**.**

To the West:

Stevens and Wilson, Historical Auto Station, 2607 N Vancouver Avenue (Site I, Adjacent west to the Property beyond N Vancouver Avenue).

The dry cleaners establishment was in service between at least 1935 and 1940.

Oregon Rug and Mattress Co., Historical Dry Cleaners, 2651 N Vancouver Avenue (Site J, Adjacent west to the Property beyond N Vancouver Avenue).

The dry cleaners establishment was in service between at least 1960 and 1970.

Heating Oil Tank, DEQ LUST No. 26-19-0008, 2667 N Vancouver Avenue (Site K, Adjacent and west beyond N Vancouver Avenue).

A heating-oil tank was decommissioned by removal in January 2019 after it was encountered during excavation activities for a utility vault installation. Oily water leaked out of the punctured tank to the subsurface soils and was removed from the excavation by a vacuum truck. Approximately 3.56 tons of contaminated soil were subsequently removed from the tank excavation and transported to Hillsboro Landfill for disposal. Groundwater was not encountered during excavation activities. Confirmatory soil sampling from the east wall, northeast floor, and southeast floor of the excavation did not detect heating oil above laboratory reporting limits (i.e., 25 ppm). Based on these data the contaminated soil was successfully removed and the remediation activities meet DEQ Soil Matrix Cleanup Standards. DEQ approved the heating oil tank certification and cleanup on January 28, 2019. Based on the confirmatory soil sampling data and certified soil matrix cleanup approved by DEQ, it is unlikely this leaking heating oil tank represents an environmental concern for vapor and/or contaminant migration onto the Property.

The adjacent historical industrial, automobile service stations and dry cleaners may have released hazardous substances to the subsurface and these vapors may need to be evaluated. This constitutes a REC for the subject Property.

427 additional regulatory sites within a mile radius were identified by EDR's government database search to be of possible environmental concern to the Property. These properties were eliminated as an environmental concern for the Property based on their No Further Action (NFA) status, distance from the Property, and/or hydrogeologic-cross or -down-gradient location from the Property.

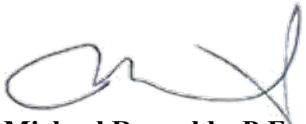
6.1.3 Additional Environmental Record Sources

In addition to State and Federal regulatory agencies local agencies, the county tax assessor, local fire district, and local and county building/planning departments were contacted by C+BEC in the course of this investigation. Information obtained from these sources is included in the applicable sections of this report.

7. INTERVIEWS

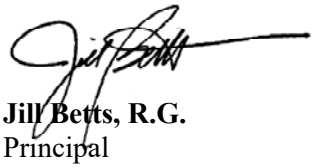
Interviews were conducted with the following individuals. Findings from these interviews are discussed in the applicable sections of this report.

- Property Owner Representatives – Mr. Ali Sadri, Corporate Director of Planning, Design and Construction
- Multnomah County Assessment and Taxation - Staff
- City of Portland Fire Marshal – Staff via On-Line Portal
- City of Portland Bureau of Development Services – Staff via On-Line Portal



On June 25, 2020, C+BEC interviewed Mr. Ali Sadri, a representative of the Property Owner. Mr. Sadri indicated he has been with Legacy Emanuel Health for approximately 14 years and did not know of any USTs, ASTs, dump sites, spills, environmental permits or notices, significantly lower-than-comparable property purchase or lease price, or environmental liens on the Property. Furthermore, he was not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Property, nor was he aware of any notices from any government entity regarding possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. Mr. Sadri was not aware of any historical documentation, nor could he locate any for the Property. Mr. Sardi indicated construction staging operations occurred on the Property between 2009 and 2011. A geotextile fabric was placed across the vacant block, 6 inches of compacted gravel were laid on top of the fabric, and construction materials were stored on the lot for approximately 14 months. The construction materials included building exterior materials, Conex storage trailers, and metal/steel work. Occasionally transport vehicles would enter the Property to move materials or for parking. The gravel and geotextile fabric were removed after the completion of construction activities.

8. ADDITIONAL SERVICES



Additional services were not completed.

9. ENVIRONMENTAL PROFESSIONALS DECLARATIONS

We, Michael Reynolds and Jill Betts, declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 Code of Federal Regulations (CFR) Part 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Michael Reynolds, P.E.
Environmental Engineer

11. QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Mr. Michael Reynolds, P.E.

Environmental Engineer

Reynolds Engineering, LLC
926 SE Umatilla Street
Portland, Oregon 97202

CREDENTIALS

M.S. Civil & Environmental Engineering,
Portland State University (2009)

B.S. Civil & Environmental Engineering,
Portland State University (2007)

B.S. Business Administration, University of Oregon (1998)

REGISTRATIONS/LICENSES

• State of Oregon Registered Professional Engineer – Civil (78938PE)
• State of Washington Registered Professional Engineer – Civil (51026)
AHERA Asbestos Building Inspector

PROFESSIONAL AFFILIATIONS

• American Council of Engineering Companies
• Northwest Environmental Business Council

FIELDS OF SPECIALIZATION

- Phase I and II Environmental Site Assessments
- Hazardous Materials Assessments
- Contaminant Fate & Transport
- Cleanup Evaluation & Implementation
- Solid & Hazardous Waste Management

PROFESSIONAL EXPERIENCE

Mr. Reynolds has over 10 years experience as an environmental engineer. He has prepared AAI-compliant Phase I Environmental Site Assessments and Hazardous Material Corridor Studies for projects ranging from a single property transaction to miles long transportation corridors. Projects have included residential, commercial, municipal, agricultural/timber, and industrial properties conducted for private and public clients throughout the Pacific Northwest.

Mr. Reynolds has a background in biogeochemistry and contaminant fate and transport mechanisms. His experience also includes Phase II Environmental Site Assessments, hazardous material assessments for buildings and infrastructure, remedial investigation and feasibility studies, cleanup action implementation and operation, and solid & hazardous waste management.

Mr. Reynolds' recent experience includes site investigation and risk assessment services for a solvent release at an industrial property that is pending sale; being the hazardous materials lead for the Oregon Department of Transportation's (ODOT's) new 2.5-mile-long Sunrise Expressway and associated improvement projects; providing hazardous materials assessment services for ODOT's Oregon Passenger Rail DEIS spanning the 125-miles between Portland and Eugene/Springfield; conducting a groundwater investigation at a former manufacturing facility to assist the City of Portland Bureau of Environmental Services with a Portland Harbor Uplands Source Control evaluation; and performing the pre-demolition hazardous building materials assessments for structures occupying a city block undergoing redevelopment into a mixed-use building in Lents.

Ms. Jill Betts, R.G., L.G.

Project Manager

C+BEC
5741 NE Flanders Street
Portland, Oregon 97213

CREDENTIALS

M.A. Geology, Temple University (1998)

B.S. Geology, State University of New York at Albany (1995)

REGISTRATIONS/LICENSES

• State of Oregon Registered Geologist
• State of Washington Licensed Geologist

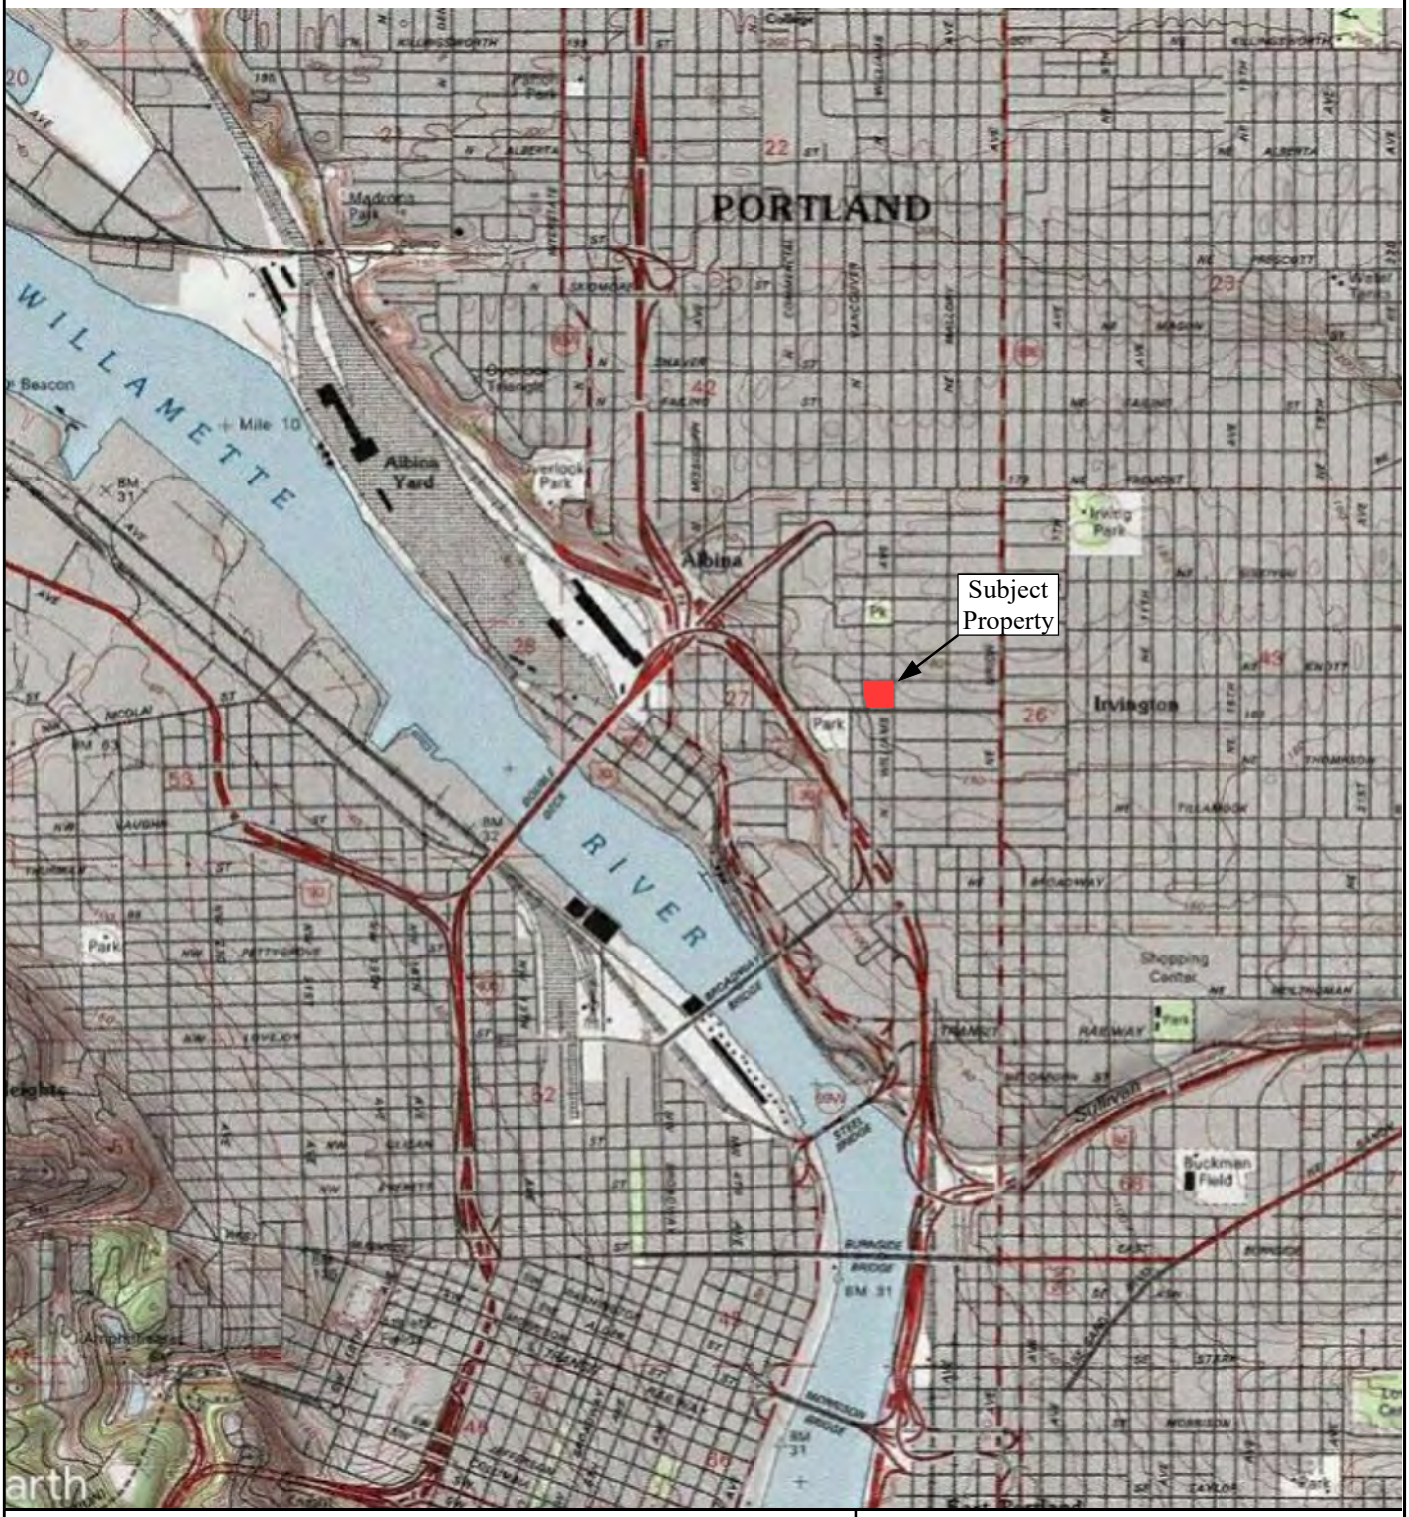
PROFESSIONAL AFFILIATIONS

• Oregon Association of Environmental Professionals
• Geological Society of America

FIELDS OF SPECIALIZATION

- Phase I and II Environmental Site Assessments
- Underground Injection Control (UIC)
- Underground Storage Tanks (USTs)
- National Pollutant Discharge Elimination System (NPDES) permitting and training
- Spill Prevention and Countermeasure Control (SPCC) planning

PROFESSIONAL EXPERIENCE



Ms. Betts has over 20 years experience and has conducted numerous Phase I and Phase II Environmental Site Assessments for a variety of residential, commercial, agricultural, and industrial properties as well as Brownfield remediation, UST investigation, remediation, and risk-based assessment, UIC compliance and remediation, NEPA compliance, and NPDES compliance and training.

Ms. Betts has achieved FCC-NEPA compliance for over 100 cell tower/antennae sites, including coordination of MOUs and EAs with Oregon SHPO and the USFWS; has completed risk assessment and groundwater monitoring at LUST sites in Oregon, Washington and California; has assisted with the remediation and risk assessment of petroleum, metals, and persistent pesticide contamination during construction and site redevelopment activities that allowed the project to remain on-time and within the remediation budget; responded to spills and managed their remediation; completed waste characterization and groundwater monitoring well installation and quarterly monitoring activities at landfills; and assisted industrial and commercial clients with SPCC, TSCA, Industrial Wastewater Discharge, UIC, and NPDES permitting and compliance.

Ms. Betts has technical experience that includes project scoping, the preparation and coordination of site and remedial investigations, risk-based assessments, preparation of numerous regulatory reports and permit applications, and presentation of data to attorneys, clients, developers, construction workers, municipalities, and regulatory agencies.

Ms. Betts's most recent project experience includes the remediation and risk assessment of petroleum, petroleum constituents, and heavy metal contamination during the redevelopment of an industrial property for use as a commercial and residential property; assisting a large commercial retail chain with inventorying and registering their UICs with ODEQ's UIC Program by constructing and managing a UIC database; assist a trucking facility and asphalt plant with their Portland Harbor Uplands Source Control evaluation, including the preparation of a Source Control Document; and completing risk-base evaluations for human health and the environment at former agricultural properties that have been impacted by metals and persistent pesticides.

APPENDIX A

Client Pre-Survey Questionnaire and Disclosure

ASTM E1527-13 Phase I Environmental Site Assessment
Property Owner Questionnaire

Please complete this questionnaire for the Phase I ESA. For those questions that are not applicable please respond with an "N/A" entry so as to ensure we understand the question has not been missed. If you have any questions about an entry please call the designated Coles+Betts Environmental Consulting, LLC project manager at (503) 477-6150. If additional pages for response are necessary, please attach them to this form; a blank page is attached to the end of this questionnaire. This document and your written responses will be used in the Phase I Environmental Site Assessment (ESA) report, and as such, please ensure that it is signed under Section 2 (below).

Please Return The Completed Form To:

Total Property Size (acres)	
Total number of buildings	
Total square footage of buildings	
Date of construction	
Dates of significant renovation	
Waste water discharge ☐ Municipal Sanitary Sewer ☐ On-site septic system ☑ Other	
Potable water source ☐ Community Water Supplier ☐ On-site well ☑ Other	
Please describe prior use(s) of property, if known:	

5. ASTM E1527-13-REQUIRED INQUIRIES

Property Owner: Name: Legacy Hospital	Phone:	Fax:
Key Site Manager (Site contact): Name: Legacy Hospital	Phone:	Fax:

Property Type:

☐ Residential – number of units____ Are the units currently occupied? ☐ Yes ☐ No

☐ Commercial - please provide a list of tenants including contact names and phone numbers

☑ Other Please describe: land is vacant

Please Answer the Following Questions:
(For all *yes* entries, please explain in space provided or on the last page of this questionnaire)

Can you provide a Current Title Abstract for the Property, including a chain of Title? If so, please send documents with completed questionnaire to Coles + Betts Environmental Consulting, LLC. Yes →	☐ Yes	☑ No
Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? Yes →	☐ Yes	☑ No
Are you aware of any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? Yes →	☐ Yes	☑ No
Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes →	☐ Yes	☑ No
Do you have any specialized knowledge that would be material in identifying recognized environmental conditions in connection with the Property? Yes →	☐ Yes	☑ No
Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? Yes →	☐ Yes	☑ No
Are you specifically aware of a reduction in the property value due to environmental issues? Yes →	☐ Yes	☑ No

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,	☐ Yes	☑ No
(a.) Do you know the past uses of the property?		
Yes →	☑ Yes	☐ No
(b.) Do you know of specific chemicals that are present or once were present at the property?	☐ Yes	☑ No
Yes →	☐ Yes	☑ No
(c.) Do you know of spills or other chemical releases that have taken place at the property?	☐ Yes	☑ No
Yes →		
(d.) Do you know of any environmental cleanups that have taken place at the property?		
Yes →		
Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?	☐ Yes	☑ No
Yes →		

8) Please state the reason for procuring this Phase I ESA:

☐ Qualify for Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”).

☑ Other (explain below)

The land is being donated to the African American community

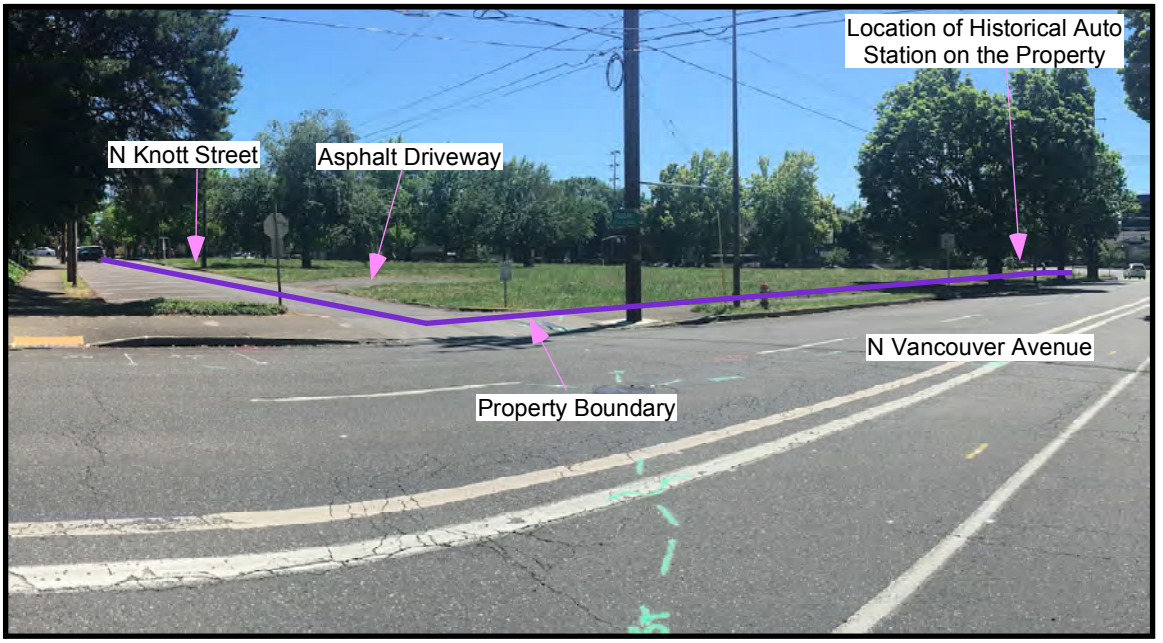
6. USEFUL DOCUMENTS

Do Any of The Following Documents Exist for the Site? (if yes, please describe or attach)		
• Environmental Site Assessment Reports	☐ Yes ☑ No	
• Environmental Compliance Audit Reports	☐ Yes ☑ No	
• Environmental Permits	☐ Yes ☑ No	
a) Industrial Discharge	☐ Yes ☑ No	
b) POTW (NPDES)	☐ Yes ☑ No	
c) Hazardous Waste Generator	☐ Yes ☑ No	
d) Air Quality	☐ Yes ☑ No	
e) Flammable Materials	☐ Yes ☑ No	
f) Aboveground or Underground Storage Tanks (AST/UST)	☐ Yes ☑ No	
g) Waste Manifest(s)	☐ Yes ☑ No	
h) Other	☐ Yes ☑ No	
• Registration for, or Existing Underground Injection Control (UIC) Systems (dry wells etc.)	☐ Yes ☑ No	
• Material Safety Data Sheets	☐ Yes ☑ No	
• Community Right to Know Plans	☐ Yes ☑ No	
• Risk Assessments	☐ Yes ☑ No	
• Safety, Spill Prevention, or Control Plans	☐ Yes ☑ No	
• Environmental Reports	☐ Yes ☑ No	
• Notices Relating to Past or Present Violations of Environmental Law	☐ Yes ☑ No	
• Building or Site Plans	☐ Yes ☑ No	

7. ON-SITE OPERATIONS/CONDITIONS

Are you aware of any of the following conditions, either past or present, on the site?		
Condition	**Response**	**If yes, please describe**
1. Stored Chemicals	☐ Yes ☑ No	
2. Underground Storage Tanks	☐ Yes ☑ No	
3. Aboveground Storage Tanks	☐ Yes ☑ No	
4. Spills or Releases	☐ Yes ☑ No	
5. Dump Areas/ Landfills	☐ Yes ☑ No	
6. Waste Treatment Systems	☐ Yes ☑ No	
7. Clarifiers/ Separators	☐ Yes ☑ No	
8. Air stacks/ Vents/ Odors	☐ Yes ☑ No	
9. Floor Drains/Sumps/Dry Wells	☐ Yes ☑ No	
10. Stained Soil/ Impacted Vegetation	☐ Yes ☑ No	
11. On-site Electrical Transformers	☐ Yes ☑ No	
12. Hydraulic lifts/ Elevators	☐ Yes ☑ No	
13. Dry Cleaning Operations	☐ Yes ☐ No	
14. Wetlands/ Flooding	☐ Yes ☑ No	
15. Oil/ Gas/ Water/ Monitoring Wells	☐ Yes ☑ No	
16. Environmental Cleanups	☐ Yes ☑ No	

8. ADJOINING PROPERTY ENVIRONMENTAL CONCERNS



Are you aware of any of the following conditions, either past or present, Adjacent to the site?		
Condition	**Response**	**If yes, please describe**
Gasoline Stations	☐ Yes ☑ No	
Dry Cleaners	☐ Yes ☑ No	
Industrial Uses	☐ Yes ☑ No	
Other Environmental Concerns	☐ Yes ☑ No

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

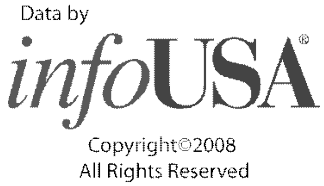
EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.



Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1924 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Coles & Betts Environmental Consulting LLC were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# 266
Project: Russell Williams

Coordinates:

Latitude:	45.541528 45° 32' 30" North

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Coles & Betts Environmental Consulting LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2020 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
EMANUEL HOSPITAL AND EPA ID:: ORD023861719	***2801 GANTENBEIN AVE***	***NNW 1/8 - 1/4 (0.176 mi.)***	***N47***	***56***

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 4 RCRA-VSQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

OR ECSI: The Environmental Cleanup Site Information System records information about sites in Oregon that may be of environmental interest. The data come from the Department of Environmental Quality.

A review of the OR ECSI list, as provided by EDR, and dated 12/01/2019 has revealed that there are 74 OR ECSI sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

OR UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Quality's UST List on Disk.

A review of the OR UST list, as provided by EDR, and dated 01/02/2020 has revealed that there are 12 OR UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 12/02/2019 has revealed that there are 10 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

OR SPILLS: Department of Environmental Spill Data.

A review of the OR SPILLS list, as provided by EDR, and dated 12/27/2019 has revealed that there is 1 OR SPILLS site within approximately 0.001 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
Not reported Incident Status: Archive Release Date: 05/21/1997 Facility ID: 1997-1377 Quantity: 960	44 NORTH KNOTT STREE	0 - 1/8 (0.000 mi.)	A4	13

OR SPILLS 90: Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

A review of the OR SPILLS 90 list, as provided by EDR, and dated 05/01/2006 has revealed that there is 1 OR SPILLS 90 site within approximately 0.001 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 12 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 11 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
OR-DEQ (Oregon - Department Of Environmental Quality) is a regulatory agency whose job is to protect the quality of Oregon's Environment. DEQ uses a combination of technical assistance, inspections and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US BROWNFIELDS:

Name:	PCRI
Address:	10 N. RUSSELL STREET
City,State,Zip:	PORTLAND, OR 97227
Recipient Name:	Portland, City of
Grant Type:	Assessment
Property Number:	R102521
Parcel size:	0.46
Latitude:	45.5408419
Longitude:	-122.6670441
HCM Label:	Address Matching-House Number
Map Scale:	-
Point of Reference:	Entrance Point of a Facility or Station
Highlights:	This site, owned by Portland Community Reinvestment Initiatives Inc (PCRI), is currently an affordable housing complex with office space on the ground floor. The building, constructed in 1911, occupies a 0.46 lot on the corner of N. Russell and N. Williams in the Elliot neighborhood. PCRI is a non-profit providing affordable housing and services to low-income families by creating and maintaining properties for over 20 years in Portland. Purchased in 2006, this site provides several below market rate affordable apartments. The non-profit Urban League of Portland occupies the ground floor retail space. In January of 2013, under direction of PCRI s lender, an initial site assessment was conducted. The report determined that a 1750 gallon underground heating oil tank was present in the

PCRI (Continued) **1016457037**

right-of-way adjacent to the property and further assessment was requested. As a non-profit, PCRI was unable to finance further assessments without placing a burden on residents to help cover the costs. PCRI contacted the Brownfield Program seeking assistance with additional site assessments in order to clarify any potential environmental concerns associated with the underground tank. It is part of PCRI s mission to provide not only affordable, but safe and healthy housing for residents as well. The Phase II investigation revealed a 2500 gallon underground heating oil tank but soil tests did not show any contamination associated with the tank. Since the Brownfield Program funded 100 percent of the Phase II investigation, PCRI was able to fund the tank decommissioning without placing a financial burden on their current residents.

FIRST FLOOR INC (Continued) **1004771607**

PORTLAND, OR 97212
Contact country: US
Contact telephone: 503-704-7361
Contact email: Not reported
EPA Region: 10
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:
Owner/operator name: FIRST FLOOR INC
Owner/operator address: 2722 NE RODNEY AVE
PORTLAND, OR 97212
Owner/operator country: US
Owner/operator telephone: 503-704-7361
Owner/operator email: Not reported
Owner/operator fax: Not reported
Owner/operator extension: Not reported
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 1999-03-10 00:00:00.
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 2002-04-19 00:00:00.0
Site name: FIRST FLOOR INC
Classification: Not a generator, verified

Date form received by agency: 1999-12-31 00:00:00.0
Site name: FIRST FLOOR INC
Classification: Not a generator, verified

Date form received by agency: 1999-03-10 00:00:00.0
Site name: FIRST FLOOR INC
Classification: Not a generator, verified

Hazardous Waste Summary:

. Waste code: NA

FIRST FLOOR INC (Continued) **1004771607**

. Waste name: NA

. Waste code: NONE
. Waste name: None

Violation Status: No violations found

FINDS:
Registry ID: 110004817510
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110004817510

Environmental Interest/Information System:
OR-DEQ (Oregon - Department Of Environmental Quality) is a regulatory agency whose job is to protect the quality of Oregon's Environment. DEQ uses a combination of technical assistance, inspections and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Chemical:

Chemical Name:	ENAMEL REDUCER
Physical Description:	LIQUID
Case Number:	67641
Facility Id:	036161
Physical State Of The Substance:	2
Average Amount Possessed During The Year Code:	11
Maximum Amount Possessed During The Year Code:	20
Applicable Unit Of Measure Code:	2
Description Of The Unit Of Measure:	GALLONS
Type Code:	F

SHERWIN WILLIAMS CO #9820 (Continued) **S104066466**

Description:	CAN
Type Code:	D
Temperature Description:	STEEL DRUM
Pressure of Code:	1
Pressure Description:	NORMAL PRESSURE
Pressure of Code:	1
Pressure Description:	NORMAL PRESSURE
Temperature Description:	NORMAL TEMPERATURE
Temperature of The Hazardous Substance Code:	4
Temperature Description:	NORMAL TEMPERATURE
Temperature of The Hazardous Substance Code:	4
Days Hazardous Substance On Site During Year:	365
Is The Substance Protected A Trade Secret:	False
Description Of The Max Qnty Code:	1,000-4,999
Description Of The Avg Qnty Code:	500-999
Most Hazardous Ingridient:	ACETONE
United Nations/north America 4 Digit Class Number:	1263
Hazard Rank:	2
EHS Ingredient:	NONE LISTED ON MSDS
Substance Pure:	False
Substance Mix:	True
First Hazardous Class Code For Chemical:	Flammable and Combustible Liquid
Second Hazardous Class Code For Chemical:	Acute Health Hazard
Third Hazardous Class Code For Chemical:	Chronic Health Hazard
Hazard Class 1 Of The Chemical:	3.0
Hazard Class 2 Of The Chemical:	6.3
Hazard Class 3 Of The Chemical:	6.4

Additional Chemical:

Chemical Is A Toxic 313 Chemical:	N
EPA Pesticide Registration Number:	Not reported
Contains 112R:	N
Contains EHS:	N
Fertilizer:	N
Pesticide:	N
Contains 313:	N

Chemical Name:	N-BUTYL ACETATE
Physical Description:	LIQUID
Case Number:	123864
